**DISCLOSURE STATEMENT**

No party to this filing has a parent corporation. No publicly held corporation owns 10% or more of the stock of any of the parties to this filing.

**STATEMENT OF INTEREST**

This amicus brief is submitted on behalf of the League of Women Voters of the United States, the League of Women Voters of Texas, the League of Women Voters of Florida, and the League of Women Voters of California (collectively, “the League”).<sup>1</sup> The League is a nonpartisan, community-based political organization that encourages informed and active participation of citizens in government and attempts to influence public policy through education and advocacy. Founded in 1920 as an outgrowth of the struggle to win voting rights for women, the League is organized in more than 850 communities and exists in every state, with more than 400,000 members and supporters nationwide.

One of the League’s primary goals is to promote government that is representative, accountable, responsive, and that assures opportunities for effective and inclusive voter participation in government decision-making. A bedrock principle of the League is the “one person, one vote” guarantee of *Reynolds v. Sims*, 377 U.S. 533 (1964), which encompasses both mathematical proportionality in congressional districts, as well as the right to an effective vote and responsive representation. This grounding principle is long held, dating back to 1966 when the League established its apportionment position: **apportionment should be based solely on population**, and the U.S. Constitution should not be amended to base apportionment on other factors.<sup>2</sup>

President Trump’s Memorandum, dated July 21, 2020,<sup>3</sup> directs the Secretary of Commerce to unconstitutionally exclude all undocumented immigrants from the apportionment base of the decennial census. If implemented, the Memorandum would unfairly and artificially reduce certain states’ representation in Congress, while improperly increasing the representation of other states. As a result,

---

<sup>1</sup> All parties have consented to the filing of this brief. No party’s counsel authored this brief in whole or in part. No party, party counsel, or person other than the League or its counsel contributed money that was intended to fund this brief’s preparation or submission

<sup>2</sup> See League of Women Voters of the United States, *Impact on Issues (2018-2020)*, at 20, <https://www.lwv.org/sites/default/files/2019-04/LWV%202018-20%20Impact%20on%20Issues.pdf>.

<sup>3</sup> *Memorandum on Excluding Illegal Aliens From the Apportionment Base Following the 2020 Census*, 85 Fed. Reg. 44,679, 44,680 (July 23, 2020) (the “Memorandum”)

1 the impact of the Memorandum will be felt not only by undocumented immigrants, but all citizens in  
2 every state. Ultimately, the Memorandum would result in decreased political representation and  
3 substantial losses in federal funding for states with sizable populations of undocumented immigrants—  
4 including California—as their apportionment base would be artificially lowered (the “Artificially-  
5 Lowered Apportionment States” or “ALA States”). Further, the Memorandum would have severe  
6 negative effects on how Americans view and interact in this democracy—through decreased  
7 participation in the census and voting in elections—throughout the country.

8         Implementing the Memorandum would have broad effects on voters and residents of every  
9 state in the country because excluding a large number of residents from the apportionment base—in  
10 violation of the Constitution on which our system of government is premised—will erode faith and  
11 trust in our democracy and Constitutional system. *See Part II, infra.* In addition, implementation of  
12 the Memorandum will likely cause societal withdrawal of families with undocumented members,  
13 which will likewise harm everyone. *See Part III, infra.* The League itself will be directly impacted  
14 because it maintains important public education, advocacy and social work programs in ALA States  
15 that will be undermined as a result of the Memorandum.

16         In addition, if the Memorandum is implemented, it will cause direct economic harm to  
17 American voters, including members of the League, not just undocumented immigrants. For ALA  
18 States, implementation of the Memorandum would strain state and local public health, education and  
19 welfare systems, which provide services for *all* residents in those states. The Memorandum’s effect  
20 would be to allocate federal funding in accordance with the number of documented individuals only,  
21 thereby under-funding the ALA States and decreasing their representation. Indeed, many members of  
22 the League reside in ALA States that will see their representation in Congress, as well as receipt of  
23 federal benefits, diminished unjustly. *See Part IV, infra.*

**SUMMARY OF ARGUMENT**

The case before this Court is not just an “immigrant” issue. Ensuring an accurate census and apportionment base is at the heart of the American democratic process and the principle of full and fair representation. As the U.S. District Court for the Southern District of New York recently explained:

[T]he Constitution mandates that every ten years the federal government endeavor to count every single person residing in the United States, whether citizen or noncitizen, whether living here with legal status or without. The population count derived from that effort is used not only to apportion Representatives among the states, but also to draw political districts and allocate power within them. And it is used to allocate hundreds of billions of dollars in federal, state, and local funds. Given the stakes, the interest in an accurate count is immense. Even small deviations from an accurate count can have major implications for states, localities, and the people who live in them — indeed, for the country as a whole.<sup>4</sup>

President Trump’s Memorandum states “[f]or the purpose of the reapportionment of Representatives following the 2020 census, it is the policy of the United States to exclude” undocumented immigrants from the congressional apportionment base “to the maximum extent feasible and consistent with the discretion delegated to the executive branch.”<sup>5</sup> The Memorandum asserts that “[i]ncreasing congressional representation based on the presence of aliens who are not in a lawful immigration status would also create perverse incentives encouraging violations of Federal law,” and that “states adopting policies . . . that hobble Federal efforts to enforce the immigration laws passed by the Congress should not be rewarded with greater representation in the House of Representatives.”<sup>6</sup>

<sup>4</sup> *New York v. United States Dep’t of Commerce*, 351 F. Supp. 3d 502, 514-15 (S.D.N.Y. 2019), *aff’d in part, rev’d in part and remanded sub nom. Dep’t of Commerce v. New York*, 139 S. Ct. 2551 (2019), and *appeal dismissed*, No. 19-212, 2019 WL 7668098 (2d Cir. Aug. 7, 2019).

<sup>5</sup> Memorandum.

<sup>6</sup> *Id.*

1 The Memorandum directs the Secretary of Commerce, “[i]n preparing his report to the  
2 President under Section 141(b) of Title 13,” to “take all appropriate action, consistent with the  
3 Constitution and other applicable law, to provide information permitting the President, to the extent  
4 practicable,” to exclude undocumented immigrants from the final determination regarding the “whole  
5 number of persons in each state” that the President transmits to Congress pursuant to 2 U.S.C. § 2(a).<sup>7</sup>

6 If allowed to go into effect, the Memorandum will erode Americans’ trust in the government,  
7 depressing participation in the census as well as dampening voter turnout and civic involvement—  
8 undermining our democracy at a particularly tumultuous time.<sup>8</sup> *See* Part II. Further, the Memorandum  
9 will likely cause withdrawal of undocumented immigrants and their families from society—including  
10 political and civic engagement—which will harm everyone. *See* Part III. Finally, the Memorandum  
11 will cause severe and irreparable injury to all residents in the ALA States by unconstitutionally  
12 reducing their political representation in Congress through the exclusion of undocumented immigrants  
13 in the apportionment base. This reduction in representation will have an impact on the federal funding  
14 that these states receive, resulting in ALA States lacking resources necessary to carry out vital  
15 functions in areas such as healthcare, education, and social welfare. These repercussions will be felt  
16 not only by undocumented immigrants residing in ALA States, but also U.S. citizens and lawful  
17 residents (including League members) in these states. *See* Part IV.

## 18 ARGUMENT

### 19 **I. THE LEAGUE’S MISSION IS TO PROTECT DEMOCRACY THROUGH THE** 20 **RIGHT TO VOTE AND EMPOWER ALL AMERICAN VOTERS.**

21 Since The League’s founding in 1920, six months before the Nineteenth Amendment was  
22 ratified and women won the national right to vote, the League has been advocating for voting rights

---

23  
24 <sup>7</sup> *Id.*

25 <sup>8</sup> Given the history of federal government-sanctioned discrimination towards communities of color,  
26 it is likely that dampened participation in the census, voter turnout, and malapportionment of federal  
resources will disproportionately impact racial minorities, especially African-American and Hispanic  
communities.

1 and political empowerment. Initially, the League’s advocacy focused on women’s suffrage, but in the  
 2 decades since, the League has advocated for voting rights and political empowerment of all voters  
 3 regardless of gender, race, class, or political ideology. Through more than 700 state and local League  
 4 chapters, the League has established robust programs to educate communities about their voting rights.  
 5 Ensuring the accuracy of the census and apportionment base is central to the League’s voting rights  
 6 and political empowerment work because the census is used to apportion political representation  
 7 among the states and delimit Congressional districts.<sup>9</sup>

8 The League performs its census-related work in three phases. First, the League spearheads  
 9 numerous education programs to inform the public about what the census is, who is counted, and why  
 10 it is important for political and economic representation. Second, through the League’s “Get Out to  
 11 Count” initiative, as well as other outreach activities, the League encourages all eligible persons to fill  
 12 out their census forms. The League has established or joined local “Complete Count Committees” to  
 13 organize and encourage people to fill out their census forms, particularly by identifying and targeting  
 14 efforts towards those communities most likely to be undercounted. Third, the League has formed a  
 15 watchdog group to ensure the census is operating in accordance with the Constitution and applicable  
 16 law. The goal of each of these activities is to ensure that the census and apportionment base accurately  
 17 reflect total population and, in turn, accurately reflects the needs of states and local communities, all  
 18 of which depend on federal funding.

19 **II. THE MEMORANDUM UNDERMINES DEMOCRACY AND ERODES TRUST IN**  
 20 **OUR CONSTITUTIONAL SYSTEM.**

21 The Memorandum’s clear intent—and its likely effect—is to shift the political representation  
 22 among the states, reducing representation in Congress of states with sizable undocumented immigrant  
 23 populations.<sup>10</sup> The directive to not count undocumented immigrants in the apportionment base is  
 24 constructed on President Trump’s “determin[ation] that respect for the law and protection of the

25 <sup>9</sup> League of Women Voters of the United States, *Census*, <https://www.lwv.org/other-issues/census>.

26 <sup>10</sup> See Memorandum.

1 integrity of the democratic process warrant the exclusion” of undocumented immigrants from the  
2 apportionment base.<sup>11</sup> In fact, the Memorandum has the opposite result, violating the Constitution and  
3 hundreds of years of precedent thereunder.<sup>12</sup> The Memorandum’s practical effect is an erosion of  
4 democracy through a reduction in political representation, diminution of federal funding, and  
5 increased political apathy, distrust and disinterest.

6 This result impacts all Americans.<sup>13</sup> Excluding undocumented immigrants from the  
7 apportionment base runs counter to the fundamental principle of representative democracy: accurate  
8 representation. In addition, the broader societal impact of the Memorandum, following the  
9 Administration’s efforts to include a citizenship question on the census, should be considered. The  
10 Administration’s repeated attacks on undocumented immigrants and the census have caused  
11 undocumented immigrants and legal residents alike to lose faith in and even become fearful and  
12 distrustful of the government. Those who become apathetic or distrustful are likely to be less  
13 politically involved across all levels of civic life, including voting.

14 In short, this is not just an “immigrant” issue, this is a democracy issue—an issue that the  
15 League throughout its history has worked hard to support. The Memorandum stands to erode faith in  
16 our democracy and Constitution.

17 **A. Representation Based on Accurate Apportionment Is the Bedrock of Our**  
18 **Democracy.**

19 Representative democracy depends on an accurate count of the population that is to be  
20 governed through its elected representatives. Indeed, the Founders of this country viewed the idea of  
21

---

22  
23 <sup>11</sup> *Id.*

24 <sup>12</sup> While this amicus brief focuses on certain of the “policy” consequences of the Memorandum, we  
25 agree with the Constitutional and statutory arguments made by plaintiffs.

26 <sup>13</sup> The negative effects of the Memorandum will be most acutely and directly felt by states whose  
27 populations include sizable numbers of undocumented immigrants, *i.e.* the ALA States (*infra*, Part  
28 IV), but all will be affected.

1 representation as even more important than suffrage itself.<sup>14</sup> From the start, representation was meant  
 2 to extend further than the right to vote; indeed, women were counted in the first census, though they  
 3 did not have the right to vote at that time. Similarly, children are counted today in the census. The  
 4 Constitution makes clear that all persons should be counted for purposes of apportionment and makes  
 5 no reference to their documentation status.<sup>15</sup> Therefore, excluding undocumented immigrants from  
 6 the congressional apportionment base undermines the “representative” core of representative  
 7 democracy.

8 The Founders based apportionment on numbers from the actual enumeration in order to “limit  
 9 political chicanery.”<sup>16</sup> By attempting to exclude undocumented immigrants from the congressional  
 10 apportionment base, the Memorandum exemplifies the exact form of political chicanery that the  
 11 Founders sought to avoid. The Memorandum makes clear that reallocating political power away from  
 12 states with larger undocumented immigrant populations is not just a predictable impact, but the explicit  
 13 purpose of excluding undocumented immigrants from the apportionment base. Exploiting  
 14 congressional apportionment for political gain is an affront to our democracy that impacts all residents  
 15 of the United States.

16 **B. The Exclusion of Undocumented Immigrants from the Apportionment Base**  
 17 **Would Create a Loss of Faith in the Democratic Process and Constitution.**

18 The census is critical for the equitable and accurate distribution of political power based on  
 19 population. The exclusion of undocumented immigrants from the apportionment base will create a  
 20 loss of faith in the democratic process. ALA States such as Texas and California will almost certainly  
 21 lose congressional seats and, thus, suffer loss of political power.<sup>17</sup> In turn, those lost seats will shift  
 22

23 \_\_\_\_\_  
 24 <sup>14</sup> Charles A. Beard, Mary Ritter, *American Citizenship* (1914).

27 <sup>17</sup> *See* Section IV.A., *infra*.

1 to other states whose political power will increase by windfall.<sup>18</sup> This inequity can be expected to  
2 discourage residents of ALA States from participating in a system tilted against them.

3 American democracy was built on the idea that our representatives would be “apportioned  
4 among the several states according to their respective numbers, counting the whole number of persons  
5 in each state.”<sup>19</sup> The Supreme Court has stated that to establish a representative democracy, “the  
6 Framers chose to use population . . . as the basis for representation,”<sup>20</sup> and that “representatives serve  
7 all residents,”<sup>21</sup> not only citizens. The exclusion of undocumented immigrants from the apportionment  
8 base is contrary to the U.S. Constitution and the foundational principles which guide our democratic  
9 system. Such flagrant disregard for the Constitution and representative democracy can be expected to  
10 breed distrust and discourage participation in civil institutions including—most immediately—  
11 participation in the census.<sup>22</sup>

12 Indeed, the Memorandum, together with the Administration’s other attacks on the census, has  
13 already dampened participation. The League is heavily involved in promoting awareness and  
14 engagement in voting and the census, and the League has observed increasing levels of disinterest and  
15 apathy in responding to the current census. The Administration’s attempt to include a “citizenship  
16 question” and, most recently, the exclusion of undocumented immigrants from the apportionment  
17 base, has generated fear in immigrant communities around census participation—*i.e.* that immigrants

25 <sup>22</sup> Expert Declaration of Matthew A. Barreto, Ph.D. (“Barreto Decl.”), at ¶ 14, *City of San Jose,*  
26 *California v. Trump*, No. 5:20-cv-05167-LHK-RRC-EMC (N.D. Cal. August 27, 2020), ECF No.  
63-3; *see also* Telemundo 62, *Implicaciones De Remover a Los Indocumentados Del Censo 2020*  
(July 22, 2020), <https://www.telemundo62.com/videos/videos-noticias/implicaciones-de-remover-a-losindocumentados-del-censo-2020/2063236/>.

1 cannot benefit from participating, but could face retaliation or other negative consequences.  
 2 Decreased participation due to fear of immigration consequences (and no benefits based on the  
 3 Memorandum) is especially impactful in the ALA States, given the proportion of undocumented  
 4 immigrants among their total population.<sup>23</sup> The Memorandum has already made the League's efforts  
 5 to galvanize the public to fill out the census (and vote) even more difficult.

6 Worse, the impacts of the Memorandum are likely to extend beyond just the next decade. Fear  
 7 and distrust of the federal government is already entrenched among the African-American community,  
 8 which has experienced long-term discrimination in many different contexts, including distribution of  
 9 federal benefits (*e.g.*, VA benefits and farm subsidies, among others). The Memorandum will lead to  
 10 decreased participation in the census and other government-based interactions, such as registering to  
 11 vote and voting, which will likely impact immigrant communities and racial minorities  
 12 disproportionately. As people choose not to respond to the census due to fear or a belief that their  
 13 response will not matter, the enumeration becomes less accurate, and undercounting and under-  
 14 representation spreads, eroding our representative democracy.

15 The League is adversely impacted as it becomes more difficult to convince distrustful and  
 16 discouraged citizens—especially among immigrant communities and racial minorities—to participate  
 17 in the census. Indeed, the League has already been forced to deal with confusion resulting from the  
 18

---

19 <sup>23</sup> In Texas alone there are 2.7 million people, including 1.4 million U.S. citizens, who live with at  
 20 least one undocumented family member (based on data from 2010 to 2014). *See* American  
 21 Immigration Council, *Immigrants in Texas* (August 6, 2020),  
 22 <https://www.americanimmigrationcouncil.org/research/immigrants-in-texas>. In California,  
 23 undocumented immigrants comprised nine percent of the state's workforce in 2016. *See* American  
 24 Immigration Council, *Immigrants in California* (August 6, 2020),  
 25 <https://www.americanimmigrationcouncil.org/research/immigrants-in-california>. In Florida, there  
 26 are nearly one million people, including almost 500,000 U.S. citizens, who lived with at least one  
 27 undocumented immigrant between 2010 and 2014. *See* American Immigration Council, *Immigrants*  
 28 *in Florida* (August 6, 2020), [https://www.americanimmigrationcouncil.org/research/immigrants-](https://www.americanimmigrationcouncil.org/research/immigrants-florida)  
 29 *florida*. The Memorandum's effort to exclude undocumented immigrants from the congressional  
 30 apportionment base will intimidate those families and citizens who live with an undocumented  
 31 immigrant, as well as immigrants who are here legally, from participating not only in the census, but  
 32 in civic life more broadly. *See infra*, Part III.

1 census operations being suspended in March due to COVID-19 and subsequently resuming only  
2 recently. The Memorandum aggravates this problem.

3 **III. THE MEMORANDUM WILL CAUSE SOCIETAL WITHDRAWAL OF FAMILIES**  
4 **WITH UNDOCUMENTED MEMBERS, HARMING EVERYONE.**

5 The Memorandum is likely to cause tangible social harm to states across the country, regardless  
6 of whether their Congressional representation is compromised, due to the withdrawal of immigrant  
7 families from civic and economic activity for fear of government monitoring, retaliation or other  
8 consequence. Just as legalization of immigration status causes social and economic benefits to society  
9 as a whole through *increased* immigrant participation—*e.g.*, through a surge in investment in language  
10 skills, education, training, and general economic assimilation<sup>24</sup>—the converse is also true: increased  
11 spotlighting and delegitimization of undocumented status causes a reactionary *withdrawal* of  
12 undocumented immigrants, their families, and their communities, leading to overall social retraction  
13 and social and economic harm.<sup>25</sup> This, in turn, jeopardizes public health, public education and public  
14 safety, and will likely have a disparately negative impact on Hispanic communities and other people  
15 of color.

16 Studies show that withdrawal behavior—where immigrants and their families disengage from  
17 interactions with government officials for fear of being persecuted, prosecuted or deported—occurred  
18 in 2019, when the Administration announced its intention to add a question to the census form  
19 inquiring about the respondent’s citizenship status.<sup>26</sup> The addition of the question caused distrust

1 among noncitizens and fear of deportation, leading to a substantially lower likelihood they would fill  
 2 out a census form.<sup>27</sup> Civic organizations and state governments have worked hard through public  
 3 relations and educational campaigns to reverse the withdrawal effect after the Supreme Court rejected  
 4 the addition of the citizenship question.<sup>28</sup> However, some of this damage cannot be undone, no matter  
 5 the efforts taken by the League or other organizations. For some people, once faith and trust in the  
 6 government is lost, and potentially replaced with fear, that change cannot be reversed.

7 The Memorandum could have an even greater chilling effect<sup>29</sup> on public participation than the  
 8 citizenship question. Because the government cannot tell one's citizenship or immigration status from  
 9 a completed census form, immigrant communities may fear that the government will try to determine  
 10 their legal status through other means, thus chilling public participation in civic life generally.<sup>30</sup> Such  
 11 a fear is hardly unwarranted: The Administration has already instructed federal agencies to seek state  
 12 and federal records to determine citizenship status, an effort with which at least four states are  
 13 complying.<sup>31</sup> Experts have suggested that, considering the legal rationale for the Memorandum is

1 specious, the Administration’s goal may not be to actually enact it, but to “create uncertainty or  
2 confusion among immigrants already wary of responding to the census.”<sup>32</sup>

3 Withdrawal from public participation does not just mean that immigrant communities will fill  
4 out the census forms at lower rates. It also means that parents will be more reluctant to take their  
5 children to the hospital if they become sick or injured<sup>33</sup>—with negative long-term public health effects  
6 in the best cases, and tragic consequences in the worst ones, especially while the COVID-19 pandemic  
7 rages.<sup>34</sup> It means fear-induced psychological trauma, especially in children, for those who live in  
8 trepidation of interacting with the community outside their door.<sup>35</sup> It means that individuals and  
9 families will be chilled from seeking redress of grievances in the legal system or appearing in court  
10 for any reason, even in cases of blatant inequity and harm.<sup>36</sup> It means that immigrant parents will  
11 more often avoid sending their kids to school.<sup>37</sup> And it means that victims of crime will be less likely  
12 to contact the police, jeopardizing public safety.<sup>38</sup>

1 The League of Women Voters has significant direct experience guiding and advocating for  
 2 vulnerable individuals and families who are timid or outright terrified—even under normal  
 3 circumstances—of interacting with the government or putting themselves in situations where they may  
 4 come in contact with authorities, especially in the arena of child public health. The specter of a  
 5 government microscope conjured by this Memorandum will likely cause many of these individuals  
 6 and families to avoid civic life and engagement, or seek assistance from public programs or authorities,  
 7 even when in dire need. This withdrawal from social and economic life adversely impacts society as  
 8 a whole, as well as the immigrants themselves.

9 **IV. IMPLEMENTATION OF THE MEMORANDUM WILL HARM INDIVIDUAL**  
 10 **STATES AND THEIR CITIZENS, REGARDLESS OF POLITICAL AFFILIATION**  
 11 **OR LEGAL STATUS.**

12 **A. Loss of Congressional Representation in Individual States.**

13 The Memorandum, if implemented, will cause some ALA States to lose representation in the  
 14 U.S. House of Representatives. The Memorandum compels undocumented immigrants to be excluded  
 15 from the apportionment base, which will substantially affect many individual states. An estimated  
 16 5.2%, 4.9%, and 5.4% of the populations of New Jersey, California, and Texas, respectively, would  
 17 be inappropriately excluded by this mandate—an extraordinary change to the population count.<sup>39</sup>  
 18 While ALA States will experience the most significant impacts, *all* state populations will be  
 19 incorrectly calculated for purposes of apportioning representatives to varying degrees because at least  
 20 some portion of the population of every state is made up of undocumented immigrants.<sup>40</sup>

21  
 22  
 23 were more likely to avoid police services upon being primed to think about immigration issues).

1 Undercounting the actual population unlawfully impacts how congressional seats are  
 2 apportioned among states. Article I, Section 2, of the United States Constitution provides:  
 3 “Representatives and direct Taxes shall be apportioned among the several states which may be  
 4 included within this Union, according to their respective Numbers.” Coupled with the Fourteenth  
 5 Amendment’s requirement that “Representatives shall be apportioned among the several states  
 6 according to their respective numbers, counting the *whole number of persons in each state . . .*”  
 7 (emphasis added), apportionment must be based on the number of all people residing in the United  
 8 States regardless of whether they are here lawfully. Indeed, the Supreme Court recently held that “the  
 9 Fourteenth Amendment calls for the apportionment of congressional districts based on the total  
 10 population,” which includes non-citizen residents, irrespective of legal status.<sup>41</sup>

11 The wholesale omission of undocumented immigrants renders the apportionment “numbers”  
 12 flawed. The ALA States will have their populations artificially decreased which, in turn, will cause  
 13 those states to have less Congressional representation in the U.S. House of Representatives than they  
 14 otherwise would.<sup>42</sup> The result will be immediate malapportionment within the House of  
 15 Representatives; this result is repugnant to fundamental principles of representative democracy. It  
 16 will also directly result in the reduction of federal and state financial support to these states for essential  
 17 services.

18 For example, California and Texas are almost certain to lose a seat if undocumented  
 19 immigrants are excluded from the apportionment base.<sup>43</sup> (Just two-and-a-half years ago, it was  
 20 estimated that Texas—based on recent population trends—would *gain* at least two, possibly three,  
 21 congressional seats following the 2020 census.<sup>44</sup>) New Jersey is also likely to lose seats if

22 <sup>41</sup> *Evenwel*, 136 S. Ct. at 1129.

23 <sup>42</sup> Gilgenbach Decl., ¶¶ 22, 23, 29, 30, 32, 33, & Tables 5-9.

<https://www.electiondataservices.com/wp-content/uploads/2017/12/>

1 undocumented immigrants are excluded from the apportionment base.<sup>45</sup> Florida and New York may  
 2 lose a seat, as well.<sup>46</sup> Thus, the ramifications of malapportionment will likely be felt by a large  
 3 percentage of the U.S. population who live in and vote in the ALA States.

4 The Memorandum directly and fundamentally affects political representation in Congress by  
 5 leaving residents of ALA States artificially underrepresented. This removal of representation affects  
 6 every single state resident—even those legal residents who will not be excluded from the  
 7 apportionment base—by creating an unbalanced distribution of power that will subsequently lead to a  
 8 decrease in the ALA States’ share of federal funds.

9 This decrease in political power is tangible.<sup>47</sup> Studies have shown that the loss of a  
 10 congressional seat likely decreases a state’s share of federal outlays due to its reduction in voting  
 11 power in Congress.<sup>48</sup> The distribution of federal funds is based, in part, on the number of seats a  
 12 geographic area holds in Congress.<sup>49</sup> Studies show that an increase in a state’s share of the number of  
 13 representatives leads to an increase in that state’s share of the federal budget.<sup>50</sup>

17 <sup>46</sup> *Id.* at ¶¶ 23, 30, & 32.

18 <sup>47</sup> The aftermath of the 1962 case in which the U.S. Supreme Court ordered a correction to  
 19 Tennessee’s apportionment law, *Baker v. Carr*, 396 U.S. 186 (1962), illustrates this. Following the  
 20 court-ordered apportionment correction, counties that were underrepresented prior to the suit due to  
 21 malapportionment saw their representation increase when apportionment was corrected. *Id.* (citing  
 22 Roy Elis, Neil Malhotra, Marc Meredith, *Apportionment Cycles as Natural Experiments*, 4  
 23 POLITICAL ANALYSIS 17, 358–376 (2009)). Further, previously underrepresented counties also saw  
 24 their share of state spending increase—the result of a transfer of about \$7 billion from  
 25 overrepresented to underrepresented counties. *Id.* (citing Stephen Ansolabehere, Alan Gerber, and  
 26 Jim Snyder, 4 AMERICAN POLITICAL SCIENCE REVIEW 96, 767-777 (2002)).

27 <sup>48</sup> Roy Elis, Neil Malhotra, Marc Meredith, *Apportionment Cycles as Natural Experiments*, 4  
 28 POLITICAL ANALYSIS 17, 358-376 (2009) (hereinafter “Elis, Malhotra, and Meredith”). It is a well-  
 established finding in political science and political economy that the loss of political power as a  
 result of the loss of representation leads to the loss of funding. *See New York v. United States Dep’t*  
*of Commerce*, 351 F. Supp. 3d at 516.

<sup>49</sup> Elis, Malhotra, and Meredith, *supra* n. 48, at p. 360.

<sup>50</sup> *Id.*

1 A further ripple effect of the malapportionment of Congressional seats is that states whose  
 2 population is artificially decreased will receive fewer Electoral College votes in future elections.  
 3 Article II, Section 1, Clause 2 of the U.S. Constitution specifies that the sum of each state’s electors  
 4 is equal to the sum of the state’s membership in Congress; the number of Electoral College votes is  
 5 directly related to the size of a state’s congressional delegation. Thus, a loss of representation  
 6 stemming from the Memorandum manipulates states’ importance and influence in future presidential  
 7 elections. California and Texas, the two most populous states in the U.S., would be harmed by this  
 8 artificial manipulation of the Electoral College.

9 This artificial shift in political power will significantly harm the League’s own members in  
 10 ALA States. The loss in representation will be felt directly—in the form of reduced political power  
 11 and reduced federal funding on a per-resident basis—by League members who reside in the ALA  
 12 States. The League’s mission will also be undermined because it will be more difficult to persuade  
 13 individuals to vote—especially in the ALA states—if their votes are expected to count for less.

14 These negative impacts will be long-lasting. For at least the next decade, the ALA States will  
 15 suffer from reduced representation in Congress (relative to representation that reflects an accurate  
 16 apportionment base). “Fairness in representation, embodied in the concept of one person, one vote, is  
 17 one of the most important normative standards against which democratic institutions are measured.”<sup>51</sup>  
 18 When a state is facing underrepresentation in Congress, all of its constituents suffer from the inequity  
 19 in power of having to “share” their representative and their resources with more of their neighbors  
 20 than do residents of other states.<sup>52</sup> The malapportionment resulting from the Memorandum will force  
 21 underrepresentation by eliminating congressional seats outright in California and Texas, most likely  
 22 New Jersey, and possibly other ALA States, as well.

<sup>51</sup> *Id.* at 373.

26 <sup>52</sup> Andrew Hacker, *Congressional Districting: The Issue of Equal Representation* (1963).

1           **B.       The Implementation of the President’s Directive Will Decrease Federal Funding**  
 2                           **to ALA States for Public Services.**

3           At least 300 federally funded programs created by Congress rely on census-specific data to  
 4 apportion approximately \$800 billion dollars annually to state and local governments.<sup>53</sup> In Texas,  
 5 Florida and California, state and local governments received \$59 billion, \$44 billion and \$115 billion,  
 6 respectively, through federal spending programs guided by data derived from the 2010 census.<sup>54</sup>  
 7 States rely on an accurate count of their population and demographic representation of their residents  
 8 for the provision of dollars for these vitally important programs.

9           For example, certain grant programs, including Medicaid, the Children’s Health Insurance  
 10 Program (“CHIP”) and the Child Care and Development Fund (“CCDF”), use the Federal Medical  
 11 Assistance Percentage (“FMAP”), which is based on the decennial census, to determine funding to the  
 12 states.<sup>55</sup> Each state’s FMAP is inversely related to its per capita income (“PCI”).<sup>56</sup> PCI is determined  
 13 by dividing state residents’ total income by total state population.<sup>57</sup> Thus, an undercount of a state’s  
 14 population results in an overestimate of its PCI.<sup>58</sup> As a result, an undercount will lead to a state’s

25 <sup>56</sup> *Id.* at 3.

26 <sup>57</sup> *Id.*

27 <sup>58</sup> *Id.* To be clear, the Memorandum does not prohibit undocumented immigrants from filling out a  
 28 census form, but because of this Administration’s hostility towards undocumented immigrants, along

1 calculated FMAP being underestimated, and that state will lose out on federal funds. For example,  
 2 studies have estimated that for FY2015, Texas and Florida lost out on \$1,161 and \$946, respectively,  
 3 in federal funds for FMAP-guided programs for every person missed by the 2010 census.<sup>59</sup> An  
 4 undercount of just 1% equated to total losses of \$291,908,615 for Texas and \$177,848,466 for Florida  
 5 in FY2015.<sup>60</sup> These losses are likely to be even greater as a result of the Memorandum because  
 6 undocumented immigrants account for an estimated 5.4% of Texas and 3.4% of Florida's population.<sup>61</sup>  
 7 With Medicaid alone comprising about 40% of Texas and 30% of Florida's total funds received from  
 8 federal spending programs, an undercount would result in huge losses thereby directly impacting the  
 9 ability to care for those that live in these states.<sup>62</sup> Thirty-seven other states stand to lose out on similar  
 10 proportions of their state budgets due to undercounting and will similarly experience the negative  
 11 ramifications of underfunding.<sup>63</sup>

12 Moreover, the fiscal impact of an undercount extends beyond FMAP-related funding  
 13 programs. Many other programs use census data in formulas to allocate funds or determine eligibility.  
 14 For example, the U.S. Department of Housing and Urban Development uses measures of income,  
 15 population, housing overcrowding, age, and population growth to allocate funding through  
 16

---

17 with the Memorandum's advancement of such hostility, undocumented immigrants are effectively  
 18 discouraged from filling out census forms.

19 <sup>59</sup> Reamer, *Role of Decennial Census*, *supra* n. 53, at 3.

20 <sup>60</sup> *Id.* at 4. California is one of thirteen States currently receiving the minimum FMAP rate, so,  
 21 barring any other federal policy changes, FMAP-guided funding in California would not be affected  
 22 by an undercount.

23 <sup>61</sup> See Gilgenbach Decl., Tables 2 & 4.

24 <sup>62</sup> Reamer, *Texas Report* at 2, and *Florida Report* at 2, *supra* n. 54. Funding for Medicaid is separate  
 25 from funding for other vital health and wellness programs, including CHIP, Women Infant and  
 26 Children, and State Nutritional Assistance Program, all of which also rely on census data.

27 <sup>63</sup> Reamer, *Role of Decennial Census*, *supra* n. 53, at 2-3. Increased withdrawal, discussed in  
 28 Section III *supra*, will not offset the strain on resources caused by undercounting and under-  
 allocation because *any* use of public resources by an uncounted individual would be one for which  
 there was no allocation. See, e.g., Reamer, *Role of Decennial Census*, *supra* n. 53, at 3 (listing the  
 fiscal losses by state in FMAP-guided programs per person missed in the 2010 Census).

1 Community Development Block Grants.<sup>64</sup> In addition, the calculation and distribution of Section 8  
 2 (and other housing programs) is based on data supplied by the Census Bureau.<sup>65</sup> In FY2016, California  
 3 received \$4,641,696,018, Texas received \$1,389,424,513, and Florida received \$1,203,603,162 for  
 4 administration of their Section 8 Voucher and Housing Assistance Payment programs.<sup>66</sup> An  
 5 undercount of population in the data that dictate this funding would cause a major loss of housing  
 6 resources for communities that most need them.

7 Education programs will also be affected by a census undercount. State education departments  
 8 and offices of children and families rely on an accurate count of the state's population, and an accurate  
 9 count of children living in low-income households, to receive adequate funding for educational  
 10 programs. For example, Title I Grants to Local Education Agencies and the National School Lunch  
 11 Program provide funds based on poverty data generated by the decennial census.<sup>67</sup> In FY2016,  
 12 California, Texas, and Florida received \$3.2 billion, \$2.8 billion and \$1.6 billion, respectively, in  
 13 federal funds for these programs.<sup>68</sup> Special education grant funding is also awarded to education  
 14 departments based on census data. In FY2016, California, Texas, and Florida received approximately  
 15 \$1.3 billion, \$1 billion and \$659 million, respectively, for special education.<sup>69</sup>

16 An undercount in the decennial census will reduce funds for not just the programs highlighted  
 17 above, but for hundreds of other vitally important programs. These inaccuracies will persist for at  
 18 least 10 years, resulting in chronic underfunding of state and local agencies as they work to serve their  
 19

28 <sup>69</sup> *Id.*

1 residents, particularly those who are most vulnerable.<sup>70</sup> Federally funded health, housing, and  
 2 education programs are critical to supporting the health and economic needs of communities facing  
 3 hardships due to COVID-19 pandemic. Census data is critical for planning standard public health  
 4 needs, addressing social inequities, and identifying and managing emergent public health threats.<sup>71</sup>  
 5 Accurate population counts are needed to determine disease prevalence rates; inaccurate counts limit  
 6 states' ability to track disease.

7 Demographic factors assessed through the census are also critical to assessing social risk  
 8 factors to disease and creating appropriate responses. Inaccuracies threaten public health in at least  
 9 four ways: (1) hindering planning efforts for standard population health needs; (2) hindering  
 10 monitoring and planning to address particular health needs for at-risk populations; (3) delaying  
 11 identification and response to novel public health threats such as COVID-19; and (4) compromising  
 12 effective tracking and management of emergent public health threats such as natural disasters.<sup>72</sup> Thus,  
 13 undercounting leaves states vulnerable not only to a lack of funding to address their residents' ongoing  
 14 health and economic needs during the pandemic, but may also lead to misguided and misinformed  
 15 responses to the pandemic and other crises that emerge in the future.

16 In sum, while the Memorandum proposes to exclude undocumented immigrants from the  
 17 apportionment base, these individuals will remain part of their respective communities, will continue  
 18 to contribute to society, and will be entitled to available social services, including healthcare and  
 19 education. Yet federal funding for state- and locally-provided healthcare and education will be
