May 19, 2022

Dear Justice McAllister:

In response to the draft Congressional maps released on May 16th, I am submitting a map which amends the proposed Congressional Districts on Long Island. Specifically, the 2nd and 3rd Congressional Districts. The new map only modifies the proposed lines of the 2nd and 3rd districts to return the 2nd district to a solely South Shore district and the 3rd district to a solely North Shore district. It leaves the rest of the Special Masters map intact.

The link below shows a map that reflects a South Shore district that is contiguous, compact, and contains South Shore communities that are of like character and concerns. This district largely mirrors the existing 2nd Congressional District that was created by the courts during the last reapportionment.

The link below also shows a compact North Shore District that is contiguous, compact and contains North Shore communities that are of like character and concerns. This district largely mirrors the existing 3<sup>rd</sup> Congressional District that was created by the courts during the last reappointment.

I am also submitting letters of support for keeping the South Shore and North Shore districts, the Long Island Builders Institute, the Long Island Contractors Association, the Building Trades Council of Nassau and Suffolk.

Thank you for your time and consideration.
