UNITED STATES DISTRICT COURT  
NORTHERN DISTRICT OF CALIFORNIA  
SAN JOSE DIVISION

NATIONAL URBAN LEAGUE, et al.,  
Plaintiffs,  
v.  
WILBUR L. ROSS, et al.,  
Defendants.

Case No. 20-CV-05799-LHK

**ORDER DENYING DEFENDANTS’  
MOTION TO DISMISS AND MOTION  
FOR STAY OF PROCEEDINGS**

Re: Dkt. Nos. 354, 355

Plaintiffs National Urban League; League of Women Voters; Black Alliance for Just Immigration; Harris County, Texas; King County, Washington; City of Los Angeles, California; City of Salinas, California; City of San Jose, California; Rodney Ellis; Adrian Garcia; National Association for the Advancement of Colored People; City of Chicago, Illinois; County of Los Angeles, California; Navajo Nation; and Gila River Indian Community (collectively, “Plaintiffs”) sue Defendants Commerce Secretary Wilbur L. Ross, Jr.; the U.S. Department of Commerce; the Director of the U.S. Census Bureau Steven Dillingham, and the U.S. Census Bureau (“Bureau”) (collectively, “Defendants”) for violations of the Enumeration Clause and the Administrative Procedure Act (“APA”).

Before the Court are Defendants’ motion to dismiss Plaintiffs’ second amended complaint,

1 ECF No. 354, and Defendants' motion for stay of proceedings, ECF No. 355. Having considered  
 2 the parties' submissions; the relevant law; and the record in this case, the Court DENIES  
 3 Defendants' motion to dismiss and motion for stay of proceedings.

4 **I. BACKGROUND**

5 **A. Factual Background**

6 The 2020 Census is "a 15.6 billion dollar operation years in the making." ECF No. 81. As a  
 7 result, after nearly a decade of preparation, Defendants adopted a final operational plan for the  
 8 2020 Census in December 2018 called the Operational Plan Version 4.0. However, in March 2020,  
 9 shortly after the beginning of data collection, the COVID-19 pandemic upended Defendants'  
 10 Operational Plan and necessitated more time for census operations. Accordingly, on April 13,  
 11 2020, Defendants adopted the COVID-19 Plan, which elongated the schedule for data collection  
 12 and processing and the Secretary of Commerce's reports of population "tabulations" to the  
 13 President and the states. *See* 13 U.S.C. § 141(b), (c). On August 3, 2020, Defendants announced  
 14 the Replan, which reduced the COVID-19 timeframes for data collection and processing by half.

15 Below, the Court first describes census data collection, data processing, and reporting in  
 16 general terms. The Court then details the deadlines for these operations under the Operational Plan  
 17 Version 4.0; the COVID-19 Plan; and the Replan. Lastly, the Court recounts reports on the Replan  
 18 by the Government Accountability Office; the Bureau's Scientific Advisory Committee; and the  
 19 Department of Commerce's Office of Inspector General.

20 **1. Deadlines for data collection, data processing, and the Secretary's reports to  
 21 the President and the states.**

22 As relevant here, there are four key deadlines in the 2020 Census. First is the deadline for  
 23 self-responses to census questionnaires. At the end of the self-response period, the Census Bureau  
 24 stops accepting responses to the census.

25 Second is the deadline on which Non-Response Follow-Up ("NRFU") ceases. NRFU  
 26 refers to the process of "conduct[ing] in-person contact attempts at each and every housing unit  
 27 that did not self-respond to the decennial census questionnaire." Fontenot Decl. ¶ 48, ECF No. 81-

1 1. “The NRFU Operation is entirely about hard-to-count populations.” ECF No. 37-5 at 219.  
 2 NRFU is thus “the most important census operation to ensuring a fair and accurate count.”  
 3 Thompson Decl. ¶ 15, ECF No. 36-2. Together, self-responses and NRFU comprise the census’s  
 4 data collection.

5 Third is the deadline for data processing after data collection. Data processing refers to the  
 6 Bureau’s “procedures to summarize the individual and household data that [the Bureau] collect[s]  
 7 into usable, high quality tabulated data products.” Fontenot Decl. ¶ 66.

8 Lastly, at the end of data collection and processing, the Secretary of Commerce issues two  
 9 reports pursuant to the Census Act: (1) “the tabulation of total population by States” for  
 10 congressional apportionment to the President by December 31, 2020, *see* 13 U.S.C. § 141(b); and  
 11 (2) a tabulation of population for redistricting to the states by April 1, 2021, *see id.* § 141(c).

12 **2. The Operational Plan Version 4.0, adopted in December 2018, provided a total**  
 13 **of 54 weeks for the 2020 Census.**

14 Defendants’ declarant, Albert E. Fontenot, Jr., Associate Director for Decennial Census  
 15 Programs at the U.S. Census Bureau,<sup>1</sup> describes the Bureau’s extensive work over nearly a decade  
 16 to develop the Operational Plan Version 4.0 (hereafter, “Operational Plan”). For example,  
 17 Associate Director Fontenot discusses eight significant census tests the Bureau performed in 2013,  
 18 2014, 2015, 2016, and 2018 to improve their field operations. Fontenot Decl. ¶ 71. Associate  
 19 Director Fontenot describes partnerships with stakeholders such as organizations, tribes, and local  
 20 governments. *E.g.*, Fontenot Decl. ¶¶ 12, 28. The Operational Plan reflects the conclusions of  
 21 subject-matter experts such as statisticians, demographers, geographers, and linguists. *See, e.g.*,  
 22 ECF No. 37-5 at 79, 144 (2020 Census Operational Plan—Version 4.0).

23 Under the Operational Plan adopted in December 2018, self-responses spanned 20.5 weeks  
 24 from March 12 to July 31, 2020. NRFU spanned 11.5 weeks from May 13 to July 31, 2020. Data

---

25  
 26 <sup>1</sup> For an organizational chart of the Census Bureau, *see* Census Bureau Organizational Chart,  
 27 <https://www.census.gov/about/who.html>, ECF No. 150-3. Director Steven Dillingham and Deputy  
 28 Director Ron Jarmin head the Bureau, and their direct reports are Associate Directors.

1 processing spanned 22 weeks from August 1 to December 31, 2020. These operational dates  
 2 would culminate in the Secretary of Commerce issuing his reports by the statutory deadlines.  
 3 Specifically, by December 31, 2020, the Secretary would report “the tabulation of total population  
 4 by States” to the President for the purpose of Congressional apportionment. By April 31, 2021, the  
 5 Secretary would report the tabulation of population to the states for the purpose of redistricting. 13  
 6 U.S.C. § 141(b).

### 7 **3. COVID-19 pandemic causes suspension of census operations.**

8 Six days after the self-response period began on March 12, 2020, the Bureau announced on  
 9 March 18, 2020 that it would suspend all field operations for two weeks because of the COVID-19  
 10 pandemic. *See* Press Release, U.S. Census Bureau, *U.S. Census Bureau Director Steven*  
 11 *Dillingham on Operational Updates* (Mar. 18, 2020), [https://www.census.gov/newsroom/press-](https://www.census.gov/newsroom/press-releases/2020/operational-update.html)  
 12 [releases/2020/operational-update.html](https://www.census.gov/newsroom/press-releases/2020/operational-update.html).

13 The Bureau foresaw an eight-week operational delay, according to an internal Bureau  
 14 document dated March 24, 2020 and sent by the Bureau Deputy Director’s Chief Advisor, Enrique  
 15 Lamas, to senior staff. The document stressed the importance of maintaining an uncompressed  
 16 schedule. Reasons for maintaining an uncompressed schedule included completing the workload  
 17 remaining and operations that ensured a complete count of all population groups:

- 18 • The document stated that “staff had covered only about 10% of the workload when [the  
 19 Bureau] had to stop.” DOC\_7087.
- 20 • The document further noted that operations “focused on counting populations not living in  
 21 traditional housing, such as nursing home residents, college students, the military,  
 22 prisoners, the homeless, and the transitory populations are being planned and will be  
 23 conducted as it is safe for Census employees and the public to engage in face-to-face  
 24 activities. These operations and our nonresponse follow-up operation, all need to be  
 completed before the Census Bureau can begin processing the data to ensure that we have  
 a complete count of the population and not undercount specific population groups.”  
 DOC\_7088.

25 In line with the Bureau’s expectation of a long delay, the Bureau announced another two-week  
 26 suspension on March 28, 2020. Press Release, *Census Bureau Update on 2020 Census Field*  
 27 *Operations* (Mar. 28, 2020), <https://www.census.gov/newsroom/press-releases/2020/update-on->

1 [2020-census-field-operations.html](#). Further delays followed.

2 Ultimately, the Bureau’s projected eight-week delay was nine weeks plus phased restarts.  
 3 The Chief of Staff to Secretary Ross, Michael Walsh, analyzed the issues for the Secretary on May  
 4 8, 2020. Walsh wrote that “[p]ursuant to OMB guidance, the Census Bureau *completely* suspended  
 5 decennial field operations for 47 days between March 18 and May 4,” and then resumed  
 6 operations in phases thereafter. DOC\_2287 (emphasis in original) (“Operational Timeline”  
 7 memo). Walsh flagged issues with two operations especially important to avoiding undercounts,  
 8 enumerator onboarding and “Update Leave”:

- 9 • Onboarding enumerators “entails recruitment, selection, acceptance and gathering of any  
 10 additional information, fingerprinting, background checks, onboarding, and training”  
 11 approximately 340,000–500,000 enumerators. *Id.* “The suspension of field operations  
 12 curtailed preparation for this [onboarding], as much of it required personal contact.” *Id.*  
 13 After onboarding, enumerators “visit non-responding households and conduct in-person  
 14 interview to obtain census responses.” DOC\_2287.
- 15 • Update Leave, as Walsh wrote, “helps reach 5 million homes in the USA in rural and  
 16 remote areas that lack city-style mail.” *Id.* Update Leave reaches those homes by having  
 17 Census “field staff hand-deliver questionnaires,” *id.* at 6, to “areas where the majority of  
 18 the housing units do not have mail delivery . . . or the mail delivery information for the  
 19 housing unit cannot be verified.” Fontenot Decl. ¶ 46. Before the complete suspension of  
 20 operations, “approximately 10% of the initial [Update Leave] workload had been  
 21 completed.” DOC\_2287. By contrast, “[u]nder initial projections, 100% of the Update  
 22 Leave workload should have been completed by April 17.” *Id.*

23 The May 8, 2020 Operational Timeline memo also foresaw problems with “[d]ata processing and  
 24 integrity.” *Id.* (emphasis omitted). “[T]he pandemic has made impacts that will require additional  
 25 processing and expertise because populations have temporarily shifted.” *Id.* As a result, the memo  
 26 suggested that the 2018 Operational Plan’s provision of 152 days (about 22 weeks) for data  
 27 processing was not enough. *Id.*

28 As field operations began restarting under the COVID-19 Plan detailed below, the Bureau  
 encountered COVID-related challenges. In particular, the Bureau had trouble retaining  
 enumerators and conducting in-person visits in NRFU. On retaining enumerators, Associate  
 Director for Field Operations Timothy Olson wrote to other senior officials on July 23, 2020 that

1 “[the Bureau] had a huge quit rate from training to deployed in field (and this does not mirror past  
2 censuses at all – it is MUCH higher, almost a debilitating higher quit rate). And this translate[d]  
3 into much slower production in the field because we have less than half the number of  
4 enumerators (38%) we need to get the job done.” DOC\_7737.

5 Issues with NRFU visits were flagged in a June 10, 2020 presentation sent by the Chief of  
6 Staff to Director Dillingham, Christa Jones, to Deputy Director Jarmin and the Chief of Staff to  
7 the Deputy Secretary of Commerce, Dan Risko. DOC\_6545. On a slide titled “Risks and  
8 Challenges Due to COVID-19,” the presentation stated that COVID-19 had “le[]d to new risks and  
9 unknowns for the operation.” *Id.* Four risks stood out: (1) a lower case resolution rate because  
10 respondents “may be less likely to answer their door”; (2) challenges with staffing and training;  
11 (3) a complex schedule; (4) and a “de-scoped” early NRFU operation that presumably had been  
12 delayed by COVID. *Id.*

13 By July 30, 2020—by which time the Bureau had already been directed to create the  
14 Replan, as discussed below—enumerator staffing was still low. DOC\_8623. Many cities across  
15 several Area Census Offices had roughly 50% shortfalls in enumerator staffing compared to the  
16 Bureau’s internal target. *Id.* Plaintiffs’ affidavits allude to similar issues with finding enumerators.  
17 In Monterey County, California, for instance, the pandemic made it harder to hire and retain  
18 enumerators “because traditional applicant groups like senior citizens have concerns about the risk  
19 of catching COVID-19.” Gurmilan Decl. ¶ 13.

20 **4. The COVID-19 Plan, adopted on April 13, 2020, provided 71.5 weeks for the**  
21 **2020 Census.**

22 As a result, on April 13, 2020, the Bureau issued an adjustment to its Operational Plan to  
23 account for the impact of COVID-19 (the “COVID-19 Plan”). ECF No. 37-3 (April 13, 2020  
24 statement of Secretary of Commerce Wilbur Ross and Census Bureau Director Steven  
25 Dillingham). The COVID-19 Plan extended the deadlines. Specifically, first, the COVID-19 Plan  
26 expanded the deadlines for self-responses from 20.5 weeks to 33.5 weeks (March 12 to October  
27 31, 2020) to account for the pandemic’s disruptions to Bureau operations and the public’s ability

1 to respond to the census. Second, NRFU likewise expanded from 11.5 weeks (May 13 to July 31,  
2 2020) to 12 weeks (August 11 to October 31, 2020).

3 Third, given the pandemic’s effects on “the quality of the data, especially for groups that  
4 are less likely to self-respond (often hard to count populations),” post-data collection quality  
5 control was deemed especially important. ECF No. 37-7 at 18. Data processing for congressional  
6 apportionment thus expanded from 22 weeks (August 1 to December 31, 2020) to 26 weeks  
7 (November 1, 2020 to April 30, 2021). The processing was to include an independent review of  
8 the final address list, analysis by subject-matter experts, and the remediation of software errors.  
9 Fontenot Decl. ¶ 89.

10 Lastly, the press release announcing the COVID-19 Plan stated that “the Census Bureau is  
11 seeking statutory relief from Congress of 120 additional calendar days to deliver final  
12 apportionment counts.” ECF No. 37-3 at 3. The COVID-19 Plan would thus “extend the window  
13 for field data collection and self-response to October 31, 2020, which will allow for apportionment  
14 counts to be delivered to the President by April 30, 2021, and redistricting data to be delivered to  
15 the states no later than July 31, 2021.” *Id.*

16 Although these delays would result in the Bureau missing statutory deadlines, the President  
17 of the United States and Bureau officials publicly stated that meeting the December 31, 2020  
18 deadline would be impossible in any event. On the day the COVID-19 Plan was announced,  
19 President Donald J. Trump stated, “I don’t know that you even have to ask [Congress]. This is  
20 called an act of God. This is called a situation that has to be. They have to give it. I think 120 days  
21 isn’t nearly enough.” ECF No. 131-16 at 4.

22 On May 14, 2020, the Bureau’s Chief of Intergovernmental Affairs, Chris Stanley, sent a  
23 memo to Secretary Ross on what Ross would say to mayors about the 2020 Census. DOC\_14997.  
24 According to the memo, Secretary Ross would call mayors on May 15, 2020 to tell them that  
25 “there is still more than enough time for your residents to self-respond. Due to the coronavirus, we  
26 have extended the time for planned census field operations for the 2020 Census by 3 months –  
27 from July 31 to October 31.” *Id.*

1 On May 26, 2020, the Bureau's Associate Director for Field Operations, Timothy Olson,  
2 stated that "[w]e have passed the point where we could even meet the current legislative  
3 requirement of December 31. We can't do that anymore. We -- we've passed that for quite a while  
4 now." Nat'l Conf. of Am. Indians, 2020 Census Webinar: American Indian/Alaska Native at  
5 1:17:30–1:18:30, YouTube (May 26, 2020), <https://www.youtube.com/watch?v=F6IyJMtDDgY>.

6 Likewise, on July 8, Associate Director Fontenot confirmed that the Bureau is "past the  
7 window of being able to get" accurate counts to the President by December 31, 2020. U.S. Census  
8 Bureau, *Operational Press Briefing – 2020 Census Update* at 20–21 (July 8, 2020),  
9 [https://www.census.gov/content/dam/Census/newsroom/press-kits/2020/news-briefing-program-](https://www.census.gov/content/dam/Census/newsroom/press-kits/2020/news-briefing-program-transcript-july8.pdf)  
10 [transcript-july8.pdf](https://www.census.gov/content/dam/Census/newsroom/press-kits/2020/news-briefing-program-transcript-july8.pdf).

11 The Bureau's internal view on missing the statutory deadlines was similar. Days after  
12 announcing the COVID-19 Plan, the Bureau prepared for a call on April 28, 2020 with  
13 Congressman Jamie Raskin, Chair of the House Oversight Subcommittee on Civil Rights and  
14 Civil Liberties, which has jurisdiction over the census. In preparation for that call, the Bureau's  
15 Chief of Congressional Affairs, Christopher Stanley, circulated a memo to Director Dillingham  
16 and other senior officials. *See* DOC\_2224. The memo answered possible questions about missed  
17 deadlines.

18 Two questions and answers ("Q&As") stood out. The first Q&A contemplated that any  
19 data collection after August 14 would make meeting the deadlines infeasible. The Q&A asked why  
20 the Bureau couldn't "collect data after August 14 and still deliver redistricting data on time?"  
21 DOC\_2227. The answer was that the Bureau had "examined [the] schedule and compressed it as  
22 much as [the Bureau] c[ould] without risking significant impacts on data quality. Given the  
23 important uses of census data collection processing, it is vital that [the Bureau] not shortcut these  
24 efforts or quality assurance steps." *Id.*

25 The second Q&A asked whether "delaying the apportionment data [was] constitutional?"  
26 The answer was that "[t]he proposal underwent a constitutional review, and we believe it is  
27 constitutional and that the adjusted schedule will help us fulfill the constitutional requirement of a

1 complete and accurate census. . . . In history, especially for the many of the earlier censuses, data  
 2 collection and reporting the counts shifted beyond the zero year.” DOC\_2228. By “counts shifted  
 3 beyond the zero year,” the Bureau presumably was referring to census reports that had been made  
 4 in the calendar year after the statutory deadline. Those reports were for the censuses of 1810,  
 5 1820, 1830, and 1840. ECF No. 203 (explaining examples); *see, e.g.*, Act of Sept. 1, 1841, ch. 15,  
 6 § 1, 5 Stat. 452, 452 (second *post hoc* extension of September 1, 1841 for original deadline missed  
 7 by over nine months). In those censuses, after one or more deadlines had passed without the  
 8 enumeration having been completed, Congress extended the relevant deadlines after the fact. *See*  
 9 ECF No. 203.

10 Moreover, without a deadline extension from Congress, the Census Bureau has twice  
 11 missed the statutory deadline for completing data collection, but continued collecting data.  
 12 Specifically, in the 1940 and 1950 Censuses, Congress provided only two weeks for the  
 13 enumeration of large cities (*i.e.*, cities with population over 250,000) and 30 days for the rest of  
 14 the country. *See* Pub. L. No. 71-13, § 6, 46 Stat. 21, 23 (1929) (“*Provided*, that in any city having  
 15 [2500,000] inhabitants or more under the preceding census[,] the enumeration of the population  
 16 shall be completed within two weeks from the commencement thereof.”). Even so, the Bureau  
 17 continued data collection because meeting those deadlines would have led to an inaccurate count.  
 18 *See* Census Bureau, *The 1950 Censuses—How They Were Taken* at 19 (1955),  
 19 <https://www2.census.gov/prod2/decennial/documents/1950/proceduralHistory/00322994ch04.pdf>  
 20 (“In a few districts, this schedule had to be modified because of bad weather, floods, recruitment  
 21 problems, short working hours, and unsatisfactory enumeration.”); The United Press, *17,000,000*  
 22 *Still Unlisted As Census Taking Lags*, N.Y. Times (Apr. 24, 1940),  
 23 <https://timesmachine.nytimes.com/timesmachine/1940/04/24/92949988.html?pageNumber=1>  
 24 (“Census officials estimated today that they still had 17,000,000 persons to count . . . . Several  
 25 weeks’ more work will be required to find every one.”). Unlike in the 1810 through 1840  
 26 Censuses, Congress never extended the deadlines for the 1940 and 1950 Census after the fact.

27 On May 8, 2020, Secretary Ross’s Chief of Staff, Michael Walsh, sent the “Operational  
 28

1 Timeline” memo to the Secretary. The Operational Timeline memo found that:

2 If the Census Bureau could fully restart today, under ideal conditions . . . the  
3 earliest you could finish NRFU, even with the ability to restart immediately every  
4 state, is approximately September 1, 2020. By finishing NRFU on September 1,  
5 2020, apportionment counts could not be delivered until January 31, 2021, already  
6 after the statutory deadline. Redistricting information would be provided to states  
7 by April 30, 2021, already after the statutory deadline.

8 **Based on the initial suspension of field activities in line with OMB guidance,  
9 the Census Bureau can no longer meet its statutory deadlines for delivering  
10 apportionment and redistricting data, even conducting operations under  
11 unrealistically ideal conditions.**

12 DOC\_2288 (emphasis in original) (bullet points omitted).

13 All the above operational concerns were ultimately reflected in the census response data.  
14 As of June 2020, “self-response rates var[ie]d widely across states and counties,” with “markedly  
15 different operational environments and challenges” facing the Bureau “from one locale to  
16 another.” ECF No. 37-7 at 6 (citing self-response rates “below 3 percent” in counties in Alaska,  
17 Texas, Utah, and South Dakota).

18 **5. The Replan, adopted on August 3, 2020, reduced the time for the 2020 Census  
19 from 71.5 weeks to 49.5 weeks.**

20 On July 20, 2020, the Bureau’s Chief Financial Officer, Ben Page, asked other senior  
21 officials whether the Bureau still supported Congressional extension of the statutory deadlines.

22 DOC\_6852 (July 20, 2020 email to Director Dillingham et al.). Page wrote:

23 Among the first questions I am getting is “Does the Census bureau still need the  
24 change in the statutory dates?” Can we find a time to discuss how we should  
25 respond to that question? Given that the Senate may introduce a bill today or  
26 tomorrow, I anticipate we’ll need a set answer for discourse over the next 24-48  
27 hours.

28 *Id.*

On July 21, 2020, President Trump issued a memorandum declaring the United States’  
policy to exclude undocumented immigrants from the congressional apportionment base. *See*  
*Excluding Illegal Aliens From the Apportionment Base Following the 2020 Census*, 85 Fed. Reg.  
44,679 (July 21, 2020) (“Presidential Memorandum”).

1 On July 23, 2020, Associate Director Fontenot started an email thread with several senior  
2 Bureau officials, including Deputy Director Ron Jarmin and Associate Director for Field  
3 Operations Timothy Olson. Associate Director Fontenot began the thread by stating that on July  
4 27, he would tell the Department of Commerce about the “reality of the COVID Impacts and  
5 challenges”:

6 On Monday at DOC [Department of Commerce] I plan to talk about the difference  
7 between goal and actual case enumeration (Currently a shortfall (11 % goal vs 7%  
8 actual) and attribute it to the higher drop out rate and (ideally with reasons) and  
9 what we are going to do to address the technology drop outs.)

10 I think it is critical to lay the groundwork for the reality of the COVID Impacts and  
11 challenges.

12 Does anyone have any problems with my approach?

13 DOC\_7737. In response, Associate Director Olson “agree[d] that elevating the reality is critical,  
14 especially in light of the push to complete NRFU asap for all the reasons we know about.”

15 DOC\_7738. Those reasons are not in the administrative record.

16 Associate Director Olson then “sound[ed] the alarm” on “deliver[ing] apportionment by  
17 12/31” in the strongest possible terms:

18 We need to sound the alarm to realities on the ground – people are afraid to work  
19 for us and it is reflected in the number of enumerators working in the 1a ACOs  
20 [Area Census Offices]. And this means it is ludicrous to think we can complete  
21 100% of the nation’s data collection earlier than 10/31 and any thinking person who  
22 would believe we can deliver apportionment by 12/31 has either a mental  
23 deficiency or a political motivation.

24 *Id.* One reason that accelerating the schedule would be “ludicrous,” Associate Director Olson  
25 stated, was the “awful deploy rate” of enumerators about 62% below target. *Id.* Driving that  
26 shortfall was “almost a debilitating higher quit rate”:

27 Another tack is to provide crystal clear numbers by the 1a ACOs that shows the  
28 awful deploy rate - field selected the right number (big number) to training, training  
show rate was on par with prior censuses (albeit a few points lower ... but overall in  
line with past censuses). And then we had a huge quit rate from training to  
deployed in field (and this does not mirror past censuses at all - it is MUCH higher,  
almost a debilitating higher quit rate). And this translates into much slower

1 production in the field because we have less than half the number of enumerators  
2 (38%) we need to get the job done.

3 DOC\_7737.

4 On the same day as Associate Director Olson’s email (July 23, 2020), the Chief of  
5 Decennial Communications and Stakeholder Relationships, Kathleen Styles, shared a so-called  
6 “Elevator Speech” memo with Government Accountability Office (“GAO”) official Ty Mitchell  
7 and senior Bureau officials. *See* DOC\_8026 (email to GAO). The purpose of the Elevator Speech,  
8 Chief Styles wrote, was “to explain, in layman’s terms, why we need a schedule extension.” The  
9 Speech begins with a “High Level Message,” which in its entirety reads:

10 Curtailing census operations will result in a census that is of unacceptable quality.  
11 The Census Bureau needs the full 120 days that the Administration originally  
12 requested from Congress to have the best chance to produce high quality, usable  
13 census results in this difficult time. Shortening the time period to meet the original  
14 statutory deadlines for apportionment and redistricting data will result in a census  
15 that has fatal data quality flaws that are unacceptable for a Constitutionally-  
16 mandated activity.

17 DOC\_8070.

18 Still, on July 29, 2020 at a House Oversight and Reform hearing, Director Dillingham did  
19 not support extending the statutory deadline. Rather, he sidestepped questions about whether the  
20 “Administration has [] reversed direction on [the extension], and is now suggesting that they want  
21 the Census to be wrapped up quickly so that th[e] tabulation . . . could actually happen before the  
22 end of the year.” Oversight Committee, *Counting Every Person* at 3:50:42–3:51:40, YouTube (July  
23 29, 2020), <https://youtu.be/SKXS8e1Ew7c?t=13880> (questions by Congressman John Sarbanes).  
24 Director Dillingham’s response was that “I’m not aware of all the many reasons except to say that  
25 the Census Bureau and others really want us to proceed as rapidly as possible.” *Id.* at 3:51:48–  
26 3:52:02.

27 On July 30, 2020 at 9:18 a.m., Associate Director Fontenot wrote Associate Director  
28 Olson, Olson’s deputy (Assistant Director for Field Operations James T. Christy), and other  
Bureau leadership with an update on “condensing the back end of the schedule to hit the Statutory  
dates for the Apportionment count.” DOC\_15654. Associate Director Fontenot asked Olson and

1 Christy if field operations could end by September 30, 2020. Specifically, Associate Director  
 2 Fontenot wrote: “[s]o that the plan comes together would hope that you can also work toward a  
 3 9/30 end date to be out of the field. . . . If you don’t mind, let’s use the Operations meeting this  
 4 morning to discuss the first two objectives on the plan – Accelerating the start of Field operations  
 5 and maintaining staff levels.” *Id.* At 9:44 a.m., Assistant Director Christy responded: “[a]n  
 6 impossible task, but we will try.” *Id.* Seven minutes later, Associate Director Olson also chimed in:  
 7 “I’m with Jamey on this. We talked at length last night.” DOC\_15653.

8 Also on July 30, 2020, Deputy Director Jarmin wrote to Bureau leadership with  
 9 instructions from “KDK”—Deputy Secretary of Commerce Karen Dunn Kelley. Deputy Director  
 10 Jarmin stated that “[a]s we prepare stuff for tomorrow morning KDK has stressed we need to  
 11 address” four points, including “[m]eeting requirements of the PM (and EO re CVAP).”  
 12 DOC\_15718. The “PM” is the July 21, 2020 Presidential Memorandum on excluding  
 13 undocumented immigrants from the congressional apportionment base. “EO re CVAP” is  
 14 Executive Order 13,880, which directs the government to develop data on the citizen voting-age  
 15 population. *See Collecting Information About Citizenship Status in Connection With the Decennial*  
 16 *Census*, Fed. Reg. 33,821, 33823–25 (July 11, 2019).

17 On the evening of July 30 and the twilight hours of July 31, 2020, senior Bureau officials  
 18 debated how to respond to NPR’s questions about why “the Census Bureau has moved up the end  
 19 of 2020 census door knocking from Oct. 31 to Sept. 30.” DOC\_15736. In response to NPR’s  
 20 question whether “the decision was made in order to meet the current statutory deadline of Dec.  
 21 31,” Associate Director Fontenot suggested answering “[w]e have not received relief from our  
 22 statutory requirements.” DOC\_15734. Yet Associate Director for Communications Ali Ahmad  
 23 disagreed with that proposed answer. As Associate Director Ahmad explained, “Al, while true that  
 24 we haven’t received the relief[,] we are also backing away from asking for it. So I think that  
 25 answer doesn’t quite work in that fashion, because the follow up doesn’t have a great response.”  
 26 *Id.*

27 On July 31, 2020, the Bureau removed from its website the October 31, 2020 deadline for  
 28

1 data collection without any announcement or explanation. *Compare* ECF No. 37-8 (July 30  
2 Operational Adjustments Timeline), *with* ECF No. 37-9 (July 31 Operational Adjustments  
3 Timeline).

4 By August 1, 2020, the Bureau had prepared several versions for a presentation to  
5 Secretary Ross on Monday, August 3, 2020 (“August 3 Presentation”). The parties identify one  
6 version as a key document. ECF Nos. 161 at 2 (Defendants’ identification of DOC\_10275), 190 at  
7 6 (Plaintiffs’ identification of same). The Presentation’s very first slide, titled “Overview,”  
8 concludes that “to achieve an acceptable level of accuracy, at least 99% of Housing Units in every  
9 state must be resolved”:

10 Due to COVID-19 impacts, the conclusion of field operations for the 2020 Census  
11 was previously scheduled to end on October 31. In order to meet the statutory date  
12 of December 31, 2020 for apportionment, field operations must now conclude no  
13 later than September 30, 2020. Accelerating the schedule by 30 days introduces  
14 significant risk to the accuracy of the census data. In order to achieve an acceptable  
15 level of accuracy, at least 99% of Housing Units in every state must be resolved.

16 DOC\_10275–76.

17 On August 3, 2020, the Bureau issued a press release announcing a “new plan,” which the  
18 Bureau called the “Replan.” U.S. Census Bureau, *Statement from U.S. Census Bureau Director*  
19 *Steven Dillingham: Delivering a Complete and Accurate 2020 Census Count* (Aug. 3, 2020), ECF  
20 No. 37-1 (“August 3 Press Release”). In his declaration, Associate Director Fontenot avers that the  
21 Secretary approved the Replan on the day it was announced. Fontenot Decl. ¶ 85.

22 In the words of the August 3 Press release, the Replan “accelerate[d] the completion of  
23 data collection and apportionment counts by our statutory deadline of December 31, 2020, as  
24 required by law and directed by the Secretary of Commerce.” ECF No. 37-1. The time for the  
25 2020 Census was reduced from 71.5 weeks to 49.5 weeks. Specifically, self-response compressed  
26 from 33.5 weeks to 29 weeks, with the deadline advancing from October 31 to September 30.  
27 Fontenot Decl. ¶ 100. NRFU compressed from 11.5 weeks to 7.5 weeks, with the deadline  
28 advancing from October 31 to September 30. Lastly, data processing was halved from 26 weeks to  
13 weeks, with the deadline advancing from April 30, 2021 to December 31, 2020.

1 As of August 3, 2020, less than 63% of households had responded to the 2020 Census.  
2 ECF No. 37-1.

3 **6. The Government Accountability Office found that the Replan increases the**  
4 **risks to obtaining a complete and accurate 2020 Census.**

5 In June 2020, the GAO issued a Report on the 2020 Census entitled, “COVID-19 Presents  
6 Delays and Risks to Census Count,” in which the GAO noted, among other things, that staffing  
7 shortages were experienced at the Bureau’s call centers and at the Bureau’s contractor responsible  
8 for printing the six mail-in self-response forms.<sup>2</sup> ECF No. 37-7 at 8 (GAO, COVID-19 Presents  
9 Delays and Risks to Census Count (June 2020)). The Report also noted that as of June 1, 2020,  
10 counties in Alaska, Texas, Utah, and South Dakota had reported self-response rates below 3  
11 percent. *Id.* at 9.

12 In August 2020, the GAO issued a Report on the 2020 Census entitled “Recent Decision to  
13 Compress Census Timeframes Poses Additional Risks to an Accurate Count.”  
14 <https://www.gao.gov/assets/710/709015.pdf>. The Report stated: “Delays to data collection  
15 operations, public reluctance to participate in door-to-door interviews, and compressed timeframes  
16 for data collection and processing response data may affect the accuracy, completeness, and  
17 quality of the count.” *Id.* at ii (cover memo). The Report also noted that implementation of  
18 untested procedures and continuing challenges such as COVID-19 could “undermine the overall

19 <sup>2</sup> The Court may take judicial notice of matters that are either “generally known within the trial  
20 court’s territorial jurisdiction” or “can be accurately and readily determined from sources whose  
21 accuracy cannot reasonably be questioned.” Fed. R. Evid. 201(b). Courts take judicial notice of  
22 information, such as reports of the Government Accountability Office (“GAO”), Census Scientific  
23 Advisory Committee (“CSAC”), and Department of Commerce Office of Inspector General  
24 (“OIG”), which are found on government agency websites. *See Paralyzed Veterans of Am. v.*  
25 *McPherson*, 2008 WL 4183981, at \*5–6 (N.D. Cal. Sept. 9, 2008) (citing circuit and district court  
26 cases). However, to the extent any facts in the documents subject to judicial notice are subject to  
27 reasonable dispute, the Court will not take judicial notice of those facts. *See Lee v. City of L.A.*,  
28 250 F.3d 668, 689 (9th Cir. 2001) (“A court may take judicial notice of matters of public record  
... But a court may not take judicial notice of a fact that is subject to reasonable dispute.”)  
(internal quotation marks omitted), *overruled on other grounds by Galbraith v. Cty. of Santa*  
*Clara*, 307 F.3d 1119 (9th Cir. 2002).

1 quality of the count.” *Id.* at 1.<sup>3</sup>

2 **7. The Bureau’s Scientific Advisory Committee unanimously supports extension**  
3 **of the census schedule.**

4 Associate Director Fontenot’s September 22, 2020 declaration states: “In the midst of  
5 major West Coast fires and air quality issues that have accelerated since September 11, and the  
6 current impacts of Hurricane Sally across the states of Louisiana, Mississippi, Alabama, the  
7 Florida panhandle area, parts of Georgia, and South Carolina, I stated publicly on September 17,  
8 2020 in the Census Scientific Advisory Committee meeting that I did not know whether Mother  
9 Nature would allow us to meet the September 30 date.” ECF No. 196-1 ¶ 14.

10 The next day, on September 18, 2020, the Census Scientific Advisory Committee  
11 (“CSAC”) unanimously concluded that the Census schedule should be extended. *See* Allison  
12 Plyer, Census Scientific Advisory Committee Chair, *Recommendations and Comments to the*  
13 *Census Bureau from the Census Scientific Advisory Committee Fall 2020 Meeting* (September 18,  
14 2020), [https://www.documentcloud.org/documents/7213520-Recommendations-and-Comments-](https://www.documentcloud.org/documents/7213520-Recommendations-and-Comments-to-the-Census.html#document/p2/a581794)  
15 [to-the-Census.html#document/p2/a581794](https://www.documentcloud.org/documents/7213520-Recommendations-and-Comments-to-the-Census.html#document/p2/a581794). Specifically, the CSAC found the following:

16 To ensure a successful completion of the 2020 Census in a way that is consistent  
17 with its mandate of counting everyone once and in the right place, and based on its  
18 scientific and methodological expertise, CSAC recommends that the 2020 Census  
19 operational timeline be extended per the Bureau’s April 2020 request. Counting  
20 everyone once and in the right place, using untested and never-before-used  
21 technologies, that must work together with precision, requires time. When the  
22 weather isn’t right, we postpone the launching of rockets into space. The same  
23 should be true of the decennial enumeration, the results of which will impact  
24 apportionment, redistricting, funding decisions, legal mandates and regulatory uses

25 \_\_\_\_\_  
26 <sup>3</sup> The reports of the GAO, CSAC, and OIG are not in the administrative record. In adjudicating  
27 Plaintiffs’ APA claims, the Court is permitted to go outside the administrative record “for the  
28 limited purpose of background information.” *Thompson v. U.S. Dep’t of Labor*, 885 F.2d 551, 555  
(9th Cir. 1989). The Court does not consider the reports for APA analysis. That said, many of the  
documents on which the OIG Report is based are included in the partial administrative record,  
which is the basis of the Court’s APA analysis. Moreover, the Court’s analysis of Plaintiffs’  
Enumeration Clause claim is not limited to the administrative record. Thus, for the Enumeration  
Clause claim, the Court may consider these reports for more than just background information.

of decennial Census data over the next decade.

*Id.* at 2.

**8. The Commerce Department’s Office of Inspector General found that the Replan increases the risks to obtaining a complete and accurate 2020 Census.**

On September 21, 2020, the Department of Commerce’s Office of Inspector General (“OIG”) released a report entitled “The Acceleration of the Census Schedule Increases the Risks to a Complete and Accurate 2020 Census.” Final Management Alert No. OIG-20-050-M (Sept. 18, 2020), <https://www.oig.doc.gov/OIGPublications/OIG-20-050-M.pdf>. The Report drew upon Bureau and Commerce Department documents that were produced to the OIG (the “OIG production” stated below), as well as interviews with senior Bureau officials and Director Steven Dillingham. *Id.* at 2. The report made two findings. First, “[t]he decision to accelerate the Census schedule was not made by the Census Bureau.” Information Memorandum for Secretary Ross from Peggy E. Gustafson at 1 (Sept. 18, 2020). Second, “[t]he accelerated schedule increases the risks to obtaining a complete and accurate 2020 Census.” *Id.*

On the first finding, the report detailed that:

As of mid-July 2020, the Bureau still viewed the statutory extension as necessary in order to conduct the 2020 Census completely and accurately. This view is consistent with previous public statements made by senior Bureau officials that the Bureau would no longer be able to meet the December 31, 2020, statutory deadline.

Then, in the late afternoon of Wednesday, July 29, 2020, a senior Department official told the Bureau to put together options for meeting the apportionment deadline of December 31, 2020, and brief the Secretary on those options on Monday morning, August 3, 2020.

*Id.* at 7. On the second finding, the report detailed that “senior Bureau officials believed that the largest risk to data collection posed by the accelerated plan was the decreased time to recover from possible external contingencies affecting local areas or regions.” *Id.* at 8.

As of September 21, 2020, the Census Bureau had resolved 99% of housing units in only four states. ECF No. 196-1 ¶ 13. The Bureau had stated internally in its August 3 Presentation that “[i]n order to achieve an acceptable level of accuracy, at least 99% of Housing Units in every state

1 must be resolved.” DOC\_1026.<sup>4</sup> Thus, with only nine days left before the close of data collection  
 2 under the Replan, the Bureau was missing its own requirements for state completion rates for 46  
 3 states.

#### 4 **B. Procedural History**

5 On September 24, 2020, after extraordinarily expedited proceedings recounted at length in  
 6 other orders, the Court stayed and preliminarily enjoined the Replan under the APA. ECF No. 208  
 7 (“Injunction Order”). Because Plaintiffs’ APA arbitrary-and-capricious claim was dispositive in  
 8 five independent ways, the Court did not need to reach Plaintiffs’ Enumeration Clause claim or  
 9 APA pretext claim. *See* Injunction Order at 44, 46.

10 Much has transpired since the Injunction Order issued. As described below, Defendants  
 11 violated the Injunction Order. Then, Defendants sought a stay of the Injunction Order from the  
 12 Ninth Circuit and ultimately the Supreme Court. Now, Defendants have filed the instant motions  
 13 and began discovery. The Court addresses each procedural stage in turn.

##### 14 **1. Defendants violate the Court’s injunction.**

15 On September 25, 2020, Defendants appealed to the Ninth Circuit. ECF No. 210. There,  
 16 Defendants sought (1) an immediate administrative stay of the Injunction Order pending  
 17 resolution of Defendants’ stay motion; (2) a stay pending appeal; (3) and review on the merits. *See*  
 18 *Nat’l Urban League v. Ross*, No. 20-16868 (9th Cir.) (case docket).

19 Meanwhile, Defendants repeatedly violated the Injunction Order. ECF No. 288 (detailing  
 20 violations). Perhaps the most egregious violation of the Injunction Order occurred on Monday,  
 21 September 28, 2020. At 1:58 p.m., two minutes before the Court’s case management conference,  
 22 the Census Bureau tweeted one sentence: “The Secretary of Commerce has announced a target  
 23

---

24  
 25 <sup>4</sup> The Court notes these later extra-record developments for context, but does not weigh them in its  
 26 APA analysis. *But cf. Dep’t of Commerce v. New York*, 139 S. Ct. 2551, 2575 (2019) (“It is rare to  
 27 review a record as extensive as the one before us when evaluating informal agency action—and it  
 28 should be. . . . [B]ut we are ‘not required to exhibit a naiveté from which ordinary citizens are  
 free.’” (quoting *United States v. Stanchich*, 550 F.2d 1294, 1300 (2d Cir. 1977) (Friendly, J))).

1 date of October 5, 2020 to conclude 2020 Census self-response and field data collection  
 2 operations.” @USCensusBureau,  
 3 <https://twitter.com/uscensusbureau/status/1310685274104569856>. Later, the Census Bureau  
 4 issued a one sentence press release with the exact same sentence. *See* U.S. Census Bureau, *2020*  
 5 *Census Update* (Sept. 28, 2020), [https://www.census.gov/newsroom/press-releases/2020/2020-](https://www.census.gov/newsroom/press-releases/2020/2020-census-update.html)  
 6 [census-update.html](https://www.census.gov/newsroom/press-releases/2020/2020-census-update.html). Neither the one sentence tweet nor the one sentence press release provided  
 7 any explanation or information. The Court thus ordered Defendants to produce the administrative  
 8 record of this announcement. ECF No. 225.

9 The production showed three significant things. First, Defendants set the October 5 date to  
 10 meet the December 31, 2020 statutory deadline, even though Defendants were “enjoined from  
 11 implementing” that deadline. Census Bureau Deputy Director Ron Jarmin presented to Secretary  
 12 Ross two “Proposed Options for Completion of Enumeration”—both of which focused on the  
 13 December 31, 2020 deadline that the Court had stayed and enjoined Defendants from  
 14 implementing:

15 **Option 1:** Conclude field work by October 5, 2020 *in order to meet apportionment*  
 16 *delivery date of December 31, 2020.*

17 **Option 2:** Continue field work beyond October 5, 2020 in order to increase state  
 18 completion rates to 99% and to continue to improve enumeration of lagging sub-  
 19 state areas, such as tribal areas, rural areas, and hard-to-count communities.  
*However, this would not allow for delivery of state counts for apportionment by*  
*December 31, 2020.*

20 ECF No. 233 at 148 (italics added). As Deputy Director Jarmin explained to Director Dillingham  
 21 and other senior officials, Option 2 “would preclude meeting the 12/31 date, *but furthers the goal*  
 22 *of a complete and accurate 2020 Census.*” *Id.* at 130 (emphasis added). Option 1, by contrast,  
 23 would not further that goal.

24 To pick between the two options (ending data collection by or after October 5, 2020),  
 25 Secretary Ross asked which would implement the December 31, 2020 deadline. Specifically, on  
 26 September 28, 2020 at 3:52 p.m. Eastern, Secretary Ross wrote to Deputy Director Jarmin and  
 27 other senior Bureau officials: “As I prepare to make the decision, I would like to make sure that I

1 understood correctly that your team’s opinion is that if we stay in the field beyond October 5, we  
2 would not be able to meet the statutory deadline of December 31.” ECF No. 256-1 at 2. At 4:30  
3 p.m. Eastern, Deputy Director Jarmin responded: “Yes sir, we need to finish field work on 10/5 if  
4 we are to have enough time (and assuming all goes well) to finish the processing of the resident  
5 population, federally affiliated overseas and, if requested, unlawful aliens in ICE Detention  
6 Centers by 12/31. Other PM [Presidential Memorandum] related outputs would be pushed to  
7 1/11/2021.” *Id.* at 1. ECF No. 256-1.

8 Second, Deputy Director Jarmin’s response to Secretary Ross made clear that the  
9 December 31, 2020 statutory deadline intertwined with the President’s July 21, 2020  
10 Memorandum on Excluding Illegal Aliens from the Apportionment Base Following the 2020  
11 Census.

12 Third, Secretary Ross approved the October 5 date 14 minutes after the Census Bureau  
13 tweeted the October 5 date. At 5:12 p.m. Eastern—14 minutes *after* the Bureau’s tweet  
14 announcing the Secretary’s decision—Secretary Ross wrote back: “Thanks for the confirmation.  
15 Based on the staff recommendation I am extending the field operation to October [sic] 5.” *Id.*

16 Thus, on October 1, 2020, the Court (1) clarified the Injunction Order; (2) ordered certain  
17 limited relief to preserve the status quo; and (3) warned Defendants that the Court would subject  
18 them to sanctions or contempt proceedings if Defendants violated the Injunction Order again. ECF  
19 No. 288 at 14–15.

20 On September 30, 2020—the day data collection would have ended but for the Injunction  
21 Order—the reported completion rate of 16 states and the District of Columbia was still under 99%.  
22 *See* U.S. Census Bureau, *2020 Census Housing Unit Enumeration Progress by State* (Oct. 1, 2020  
23 report date), [https://2020census.gov/content/dam/2020census/news/daily-nrfu-rates/nrfu-rates-](https://2020census.gov/content/dam/2020census/news/daily-nrfu-rates/nrfu-rates-report-10-01.pdf)  
24 [report-10-01.pdf](https://2020census.gov/content/dam/2020census/news/daily-nrfu-rates/nrfu-rates-report-10-01.pdf).

25 **2. The Ninth Circuit rejects all but one of Defendants’ arguments for a stay; and**  
26 **the Supreme Court stays the Injunction Order on October 13, 2020.**

27 Also on September 30, 2020, the Ninth Circuit denied Defendants’ application for an  
28

1 immediate administrative stay. *See Nat'l Urban League v. Ross* (“*Nat'l Urban League P*”), 977  
2 F.3d 698, 703 (9th Cir. 2020). The Ninth Circuit held that issuing an administrative stay would  
3 “disband[] thousands of census workers,” thereby “eliminating the Bureau's ability to conduct  
4 field work.” *Id.* at 701. Thus, “the status quo would be upended, rather than preserved, if an  
5 administrative stay is issued” *Id.* at 703. United States Circuit Judge Patrick J. Bumatay dissented.  
6 *Id.* Judge Bumatay argued that the panel “should have granted an administrative stay here because  
7 defendants are likely to succeed on the merits.” *Id.* at 705 (Bumatay, J., dissenting).

8 On October 7, 2020, a different Ninth Circuit panel unanimously denied Defendants’  
9 motion for a stay in part and granted it in part. *Nat'l Urban League v. Ross* (“*Nat'l Urban League*  
10 *IP*”), 977 F.3d 770, 773 (9th Cir. 2020). The Ninth Circuit left in place the injunction against “the  
11 Replan and the September 30, 2020[] deadline for data collection.” *Id.* The Ninth Circuit rejected  
12 Defendants’ arguments on APA reviewability and the merits. On reviewability, Defendants failed  
13 to show that they were likely to prevail on their argument that the Replan was neither “agency  
14 action” nor “final.” *See id.* at 776–77 (discussing both parts of “final agency action”). On APA  
15 merits, the Ninth Circuit held that “[t]he district court laid out in great detail five grounds on  
16 which to find Plaintiffs were likely to succeed on their contention that the government did not  
17 meet the APA's standards for reasoned decisionmaking.” *Id.* at 777; *see id.* at 777–79 (discussing  
18 grounds).

19 However, “[t]o the extent that the district court enjoined the government from attempting  
20 to meet the December 31, 2020, statutory deadline for completing tabulations by state,” the Ninth  
21 Circuit stayed the injunction. *Id.* The Ninth Circuit reasoned, among other things, that “predictions  
22 as to whether [the December 31, 2020 deadline] can still be attained are speculative and unstable.  
23 And any harm from governmental attempts to meet the December 31 date are likely less  
24 irreparable than the injury from displacing the October 31 data collection endpoint.” *Id.* at 781.

25 Defendants then sought a stay from the Supreme Court. *See Ross v. National Urban*  
26 *League*, No. 20A62 (U.S.) (case docket), <https://www.supremecourt.gov/docket>. Defendants  
27 represented to the Supreme Court that, with a stay, Defendants could still meet the December 31,

1 2020 deadline with a 99% completion rate. *See* Defs. Stay App. at 8, *National Urban League* (U.S.  
 2 Oct. 7, 2020) (citing “sworn testimony in the record . . . of the government’s ability to meet the  
 3 statutory deadline on its proposed schedule”); *id.* at 13 (discussing completion rate and irreparable  
 4 harm). On October 13, 2020, the Supreme Court stayed the Injunction Order “pending disposition  
 5 of the appeal in the United States Court of Appeals for the Ninth Circuit and disposition of the  
 6 petition for a writ of certiorari.” *National Urban League*, No. 20A62 (U.S. Oct. 13, 2020) (slip op.  
 7 at 1). The Supreme Court’s stay order did not provide reasons for granting the stay. Defendants  
 8 have since represented to the Supreme Court that they can no longer meet the December 31, 2020  
 9 deadline. *See* Oral Arg. Tr. at 6:16–7:3, *Trump v. New York*, No. 20-366 (U.S. Nov. 30, 2020)  
 10 (“[W]e are not currently on pace to send the report to the President by the year-end statutory  
 11 deadline.”).

12 **3. Defendants file the instant motions to dismiss and to stay, and the parties start**  
 13 **discovery.**

14 On October 27, 2020, Plaintiffs filed the Second Amended Complaint. ECF No. 352  
 15 (“SAC”). On November 10, 2020, Defendants filed the instant motions (1) to dismiss the SAC;  
 16 and (2) to stay proceedings. ECF Nos. 354 (“motion to dismiss” or “mot.”), 355 (motion to stay).

17 On November 12, 2020, the parties filed a joint case management statement. ECF No. 356.  
 18 The joint case management statement proposed competing case schedules. Plaintiffs sought  
 19 discovery on their Enumeration Clause claim, which this Court had not addressed in prior orders.  
 20 Plaintiffs asked this Court for an expedited schedule with (1) a one-month discovery period; and  
 21 (2) final judgment before the Secretary’s report of congressional apportionment figures to the  
 22 president, which Plaintiffs expected sometime in early January 2021 (after the December 31, 2020  
 23 statutory deadline). ECF No. 356 at 9. By contrast, Defendants proposed that (1) the case be  
 24 stayed until the Bureau completed the 2020 Census or until Defendants’ appeal of the Court’s  
 25 preliminary injunction were resolved; and (2) following a stay, there be a three-month discovery  
 26 period. *Id.* at 10.

27 Starting with the Court’s November 13, 2020 Case Management Order and two following

1 orders, the Court explained why discovery should proceed and why such discovery should be  
2 limited. ECF Nos. 357 (Case Management Order), 372 (Dec. 10, 2020 Order to Compel), 380  
3 (Dec. 13, 2020 Order Denying Motion for Reconsideration). The Court set an expedited schedule  
4 because of the states’ “contingent redistricting deadlines” and the difficulty of granting relief after  
5 the April 1, 2020 deadline for the Secretary’s transmittal of redistricting data to the states. This  
6 schedule gave the parties eight weeks to engage in limited discovery. ECF No. 357 at 2. Because  
7 of the expedited schedule, the Court gave the parties 10 days to respond to Requests for  
8 Production and 14 days to start producing documents for which no objections were asserted. *Id.*

9 The Court also significantly limited discovery in several ways. For instance, although the  
10 Federal Rules of Civil Procedure (the “Federal Rules”) permit 10 depositions per side, the Court  
11 cut that number nearly in half, permitting only 6 depositions. *See* Fed. R. Civ. P. 30(a)(1); ECF  
12 Nos. 357 (case management order), 372 (Order to Compel). Similarly, the Federal Rules permit 25  
13 interrogatories per side, but the Court cut that number by 60%, permitting only 10 interrogatories.  
14 *See* Fed. R. Civ. P. 33(a)(1); ECF No. 357. Lastly, the Federal Rules permit an unlimited number  
15 of Requests for Admission (“RFAs”) and Requests for Production (“RFPs”), but the Court  
16 permitted only 25 RFAs and 25 RFPs per side in the instant case. *See* Fed. R. Civ. P. 34, 36; ECF  
17 No. 357.

18 On November 24, 2020, Plaintiffs filed their oppositions to Defendants’ motion to dismiss  
19 and motion to stay. ECF Nos. 364 (opposition to motion to dismiss, or “Opp’n”), 365 (opposition  
20 to motion to stay). Defendants did not file a reply in support of either motion.

## 21 **II. LEGAL STANDARD**

### 22 **A. Motion to Dismiss Under Rule 12(b)(1)**

23 A motion to dismiss pursuant to Federal Rule of Civil Procedure 12(b)(1) tests whether the  
24 court has subject matter jurisdiction. Although lack of “statutory standing” requires dismissal for  
25 failure to state a claim under Rule 12(b)(6), lack of Article III standing requires dismissal for want  
26 of subject matter jurisdiction under Rule 12(b)(1). *See Nw. Requirements Utilities v. F.E.R.C.*, 798  
27 F.3d 796, 808 (9th Cir. 2015) (“Unlike Article III standing, however, ‘statutory standing’ does not

1 implicate our subject-matter jurisdiction.” (citing *Lexmark Int’l, Inc. v. Static Control*  
 2 *Components, Inc.*, 572 U.S. 118, 128 n.4 (2014)); *Maya v. Centex Corp.*, 658 F.3d 1060, 1067  
 3 (9th Cir. 2011). A Rule 12(b)(1) jurisdictional attack may be factual or facial. *Safe Air for*  
 4 *Everyone v. Meyer*, 373 F.3d 1035, 1039 (9th Cir. 2004).

5 “[I]n a factual attack, the challenger disputes the truth of the allegations that, by  
 6 themselves, would otherwise invoke federal jurisdiction.” *Id.* In resolving such an attack, unlike  
 7 with a motion to dismiss under Rule 12(b)(6), a court “may review evidence beyond the complaint  
 8 without converting the motion to dismiss into a motion for summary judgment.” *Id.* Moreover, the  
 9 court “need not presume the truthfulness of the plaintiff’s allegations.” *Id.* Once the defendant has  
 10 moved to dismiss for lack of subject matter jurisdiction under Rule 12(b)(1), the plaintiff bears the  
 11 burden of establishing the court’s jurisdiction. *See Chandler v. State Farm Mut. Auto Ins. Co.*, 598  
 12 F.3d 1115, 1122 (9th Cir. 2010).

13 “In a facial attack,” on the other hand, “the challenger asserts that the allegations contained  
 14 in a complaint are insufficient on their face to invoke federal jurisdiction.” *Safe Air for Everyone*,  
 15 373 F.3d at 1039. The court “resolves a facial attack as it would a motion to dismiss under Rule  
 16 12(b)(6): Accepting the plaintiff’s allegations as true and drawing all reasonable inferences in the  
 17 plaintiff’s favor, the court determines whether the allegations are sufficient as a legal matter to  
 18 invoke the court’s jurisdiction.” *Leite v. Crane Co.*, 749 F.3d 1117, 1121 (9th Cir. 2014).

19 **B. Leave to Amend**

20 If a court determines that a complaint should be dismissed, it must then decide whether to  
 21 grant leave to amend. Under Rule 15(a) of the Federal Rules of Civil Procedure, leave to amend  
 22 “shall be freely given when justice so requires,” bearing in mind “the underlying purpose of Rule  
 23 15 to facilitate decisions on the merits, rather than on the pleadings or technicalities.” *Lopez v.*  
 24 *Smith*, 203 F.3d 1122, 1127 (9th Cir. 2000) (en banc) (alterations and internal quotation marks  
 25 omitted). When dismissing a complaint for failure to state a claim, “a district court should grant  
 26 leave to amend even if no request to amend the pleading was made, unless it determines that the  
 27 pleading could not possibly be cured by the allegation of other facts.” *Id.* at 1130 (internal

1 quotation marks omitted).

2 Accordingly, leave to amend generally shall be denied only if allowing amendment would  
3 unduly prejudice the opposing party, cause undue delay, or be futile, or if the moving party has  
4 acted in bad faith. *Leadsinger, Inc. v. BMG Music Publ'g*, 512 F.3d 522, 532 (9th Cir. 2008). At the  
5 same time, a court is justified in denying leave to amend when a plaintiff “repeated[ly] fail[s] to  
6 cure deficiencies by amendments previously allowed.” *See Carvalho v. Equifax Info. Servs., LLC*,  
7 629 F.3d 876, 892 (9th Cir. 2010). Indeed, a “district court’s discretion to deny leave to amend is  
8 particularly broad where plaintiff has previously amended the complaint.” *Cafasso, U.S. ex rel. v.*  
9 *Gen. Dynamics C4 Sys., Inc.*, 637 F.3d 1047, 1058 (9th Cir. 2011) (quotation marks omitted).

### 10 **C. Motion to Stay Under *Landis***

11 Under *Landis v. North American Co.*, 299 U.S. 248 (1936), the Court has “discretionary  
12 power to stay proceedings in its own court.” *Lockyer v. Mirant Corp.*, 398 F.3d 1098, 1109 (9th  
13 Cir. 2005). “A trial court may, with propriety, find it is efficient for its own docket and the fairest  
14 course for the parties to enter a stay of an action before it, pending resolution of independent  
15 proceedings which bear upon the case.” *Leyva v. Certified Grocers of California, Ltd.*, 593 F.2d  
16 857, 863 (9th Cir. 1979). “This rule applies whether the separate proceedings are judicial,  
17 administrative, or arbitral in character, and does not require that the issues in such proceedings are  
18 necessarily controlling of the action before the court.” *Id.* “Where it is proposed that a pending  
19 proceeding be stayed, the competing interests which will be affected by the granting or refusal to  
20 grant a stay must be weighed.” *CMAX, Inc. v. Hall*, 300 F.2d 265, 268 (9th Cir. 1962) (citing  
21 *Landis*, 299 U.S. at 254–55). As such, when determining whether to grant a stay, the Court weighs  
22 three factors: (1) the possible damage to the non-moving party, (2) “the hardship or inequity which  
23 a party may suffer in being required to go forward,” and (3) “the orderly course of justice.”  
24 *CMAX*, 300 F.2d at 268; *see also Lockyer*, 398 F.3d at 1110 (applying *Landis* factors).

### 25 **III. DISCUSSION**

26 The Court first addresses Defendants’ motion to dismiss. Defendants move to dismiss on  
27 five grounds for lack of jurisdiction under Federal Rule of Civil Procedure 12(b)(1). The first three

1 grounds apply to all the claims in the SAC. Specifically, Defendants argue that (1) the political  
 2 question doctrine bars Plaintiffs' claims; (2) Plaintiffs lack Article III standing; and (3) Plaintiffs'  
 3 claims are not ripe. The last two grounds, which apply to Plaintiffs' APA claims only, are that  
 4 (4) the Replan is not final agency action; and (5) the Census Bureau's "choices" (which are not  
 5 "agency action") are committed to agency discretion. Mot. at i.

6 Except for the ripeness argument, Defendants' motion to dismiss raises the same threshold  
 7 arguments that have already been rejected by this Court and the Ninth Circuit. This Court has  
 8 repeatedly ruled in Plaintiffs' favor on Defendants' threshold issues. *See, e.g.*, Order to Produce  
 9 the Administrative Record, ECF No. 86, at 9–17 (rejecting Defendants' threshold arguments);  
 10 Injunction Order, ECF No. 208, at 21–44 (same). Similarly, the Ninth Circuit has twice reviewed  
 11 this Court's Injunction Order. The first Ninth Circuit panel denied Defendants' motion for an  
 12 administrative stay of the Injunction Order. *Nat'l Urban League I*, 977 F.3d at 703. The second  
 13 Ninth Circuit panel expressly rejected Defendant's APA threshold arguments and implicitly  
 14 rejected Defendants' other threshold arguments. *See Nat'l Urban League II*, 977 F.3d at 773  
 15 (rejecting the "government's primary argument," which is lack of final agency action).

16 Below, the Court addresses all five arguments of Defendants' motion to dismiss in turn.  
 17 For ease of reference, the Court restates much of its analysis from the Injunction Order. After  
 18 resolving the motion to dismiss, the Court then addresses Defendants' motion for a stay.

19 **A. This lawsuit still does not present a political question.**

20 Defendants again argue that this lawsuit is not justiciable because it presents a political  
 21 question. Mot. at 5–10. The Court still disagrees.

22 A "political question" is one which is "outside the courts' competence and therefore  
 23 beyond the courts' jurisdiction." *Rucho v. Common Cause*, 139 S. Ct. 2484, 2494 (2019). Tellingly,  
 24 Defendants fail to offer a case that finds that the political question doctrine bars review of  
 25 decisions regarding the administration of the census. Instead, Defendants point the Court to two  
 26 defining hallmarks of a political question: "[1] a textually demonstrable constitutional  
 27 commitment of the issue to a coordinate political department; or [2] a lack of judicially  
 28 discoverable and manageable standards for resolving" the dispute. *Baker v. Carr*, 369 U.S. 186,

1 217 (1962); *accord Vieth v. Jubelirer*, 541 U.S. 267, 277–78 (2004). Defendants argue that both  
 2 are present here because (1) the Enumeration Clause vests Congress with the authority to conduct  
 3 “actual Enumeration,” Mot. at 6–7, and (2) there is no evident standard by which the Court could  
 4 evaluate the Bureau’s decision. Mot. at 8–10. Neither argument is convincing.

5 First, Defendants still cite no case—and the Court is aware of none—in which a court  
 6 declined jurisdiction over a census case on political question grounds. To the contrary, the  
 7 Supreme Court and lower courts have repeatedly rejected the argument that the political question  
 8 doctrine bars review of census-related decisionmaking. *See, e.g., U.S. Dep’t of Commerce v.*  
 9 *Montana*, 503 U.S. 442, 458–59 (1992) (holding that the “political question doctrine presents no  
 10 bar”); *Franklin v. Massachusetts*, 505 U.S. 788, 801 n.2 (1992) (noting that the Court “recently  
 11 rejected a similar argument” in *Montana* that “the courts have no subject-matter jurisdiction over  
 12 this case because it involves a ‘political question’”); *Carey v. Klutznick*, 637 F.2d 834, 838 (2d Cir.  
 13 1980) (per curiam) (rejecting the Census Bureau’s argument that “allegations as to  
 14 mismanagement of the census made in the complaint involve a political question,” and holding the  
 15 case reviewable under the Constitution and APA) (quotation omitted); *New York v. U.S. Dep’t of*  
 16 *Commerce*, 315 F. Supp. 3d 766, 791 (S.D.N.Y. 2018) (rejecting political question doctrine in  
 17 citizenship question litigation; and collecting cases); *Young v. Klutznick*, 497 F. Supp. 1318, 1326  
 18 (E.D. Mich. 1980) (rejecting political question doctrine), *rev’d on other grounds*, 652 F.2d 617  
 19 (6th Cir. 1981); *City of Philadelphia v. Klutznick*, 503 F. Supp. 663, 674 (E.D. Pa. 1980)  
 20 (same); *Texas v. Mosbacher*, 783 F. Supp. 308, 312 (S.D. Tex. 1992) (same); *District of Columbia*  
 21 *v. U.S. Dep’t of Commerce*, 789 F. Supp. 1179, 1185 (D.D.C. 1992) (same); *City of N.Y. v. U.S.*  
 22 *Dep’t of Commerce*, 739 F. Supp. 761, 764 (E.D.N.Y. 1990) (same); *U.S. House of Representatives*  
 23 *v. U.S. Dep’t of Commerce*, 11 F. Supp. 2d 76, 95 (D.D.C. 1998) (three-judge court) (same; and  
 24 stating “the court sees no reason to withdraw from litigation concerning the census”), *aff’d*, 525  
 25 U.S. 316 (1999); *see also Utah v. Evans*, 536 U.S. 452 (2002) (engaging in review without noting  
 26 any jurisdictional defect stemming from political question doctrine); *Wisconsin v. City of N.Y.*, 517  
 27 U.S. 1 (1996) (same); *Morales v. Daley*, 116 F. Supp. 2d 801 (S.D. Tex. 2000) (same), *aff’d sub*

1 *nom. Morales v. Evans*, 275 F.3d 45 (5th Cir. 2001) (unpublished); *Prieto v. Stans*, 321 F. Supp.  
2 420, 421 (N.D. Cal. 1970) (finding jurisdiction over a motion to preliminarily enjoin the census’s  
3 “mail-out, mail-back procedure” and “community education and follow-up procedures”).

4 Second, precedent supports the determination that there is a discoverable and manageable  
5 standard by which the Court can review the agency action at issue here. For example, the Census  
6 Act “imposes ‘a duty to conduct a census that is accurate and that fairly accounts for the crucial  
7 representational rights that depend on the census and the apportionment.’” *Dep’t of Commerce v.*  
8 *New York*, 139 S. Ct. 2551, 2569 (2019) (quoting *Franklin*, 505 U.S. at 819–820 (Stevens, J.,  
9 concurring in part and concurring in judgment)) (discussing 2 U.S.C. § 2a). Similarly, the text,  
10 structure, and history of the Constitution evinces “a strong constitutional interest in accuracy.”  
11 *Utah*, 536 U.S. at 455–56.

12 Thus, in its decision on the census citizenship question last year, the Supreme Court  
13 rejected Defendants’ claim that there is “no meaningful standard against which to judge the  
14 agency’s exercise of discretion.” *Dep’t of Commerce v. New York*, 139 S. Ct. at 2568 (quoting  
15 *Weyerhaeuser Co. v. United States Fish and Wildlife Serv.*, 139 S. Ct. 361, 370 (2018)). The  
16 standard is provided by the Census Act, the Constitution, and APA. Accordingly, it is no surprise  
17 that Defendants do not cite, and the Court could not find, a case in which the political question  
18 doctrine barred judicial review of census-related decisionmaking.

19 In sum, the political question doctrine does not bar the Court from reviewing the instant  
20 case.

21 **B. Plaintiffs still have standing to challenge the Replan.**

22 Next, Defendants again argue that Plaintiffs lack standing. Defendants were incorrect  
23 before and are incorrect now.

24 “To have standing, a plaintiff must ‘present an injury that is concrete, particularized, and  
25 actual or imminent; fairly traceable to the defendant’s challenged behavior; and likely to be  
26 redressed by a favorable ruling.’” *Dep’t of Commerce v. New York*, 139 S. Ct. at 2565. Plaintiffs  
27 here allege—and support with affidavits—the same four injuries that the Supreme Court found

1 supported standing in the citizenship question case: “diminishment of political representation, loss  
2 of federal funds, degradation of census data, and diversion of resources.” *Id.* at 2565 (upholding  
3 findings as not clearly erroneous).

4 The Court first discusses each of Plaintiffs’ four alleged injuries. Then, the Court explains  
5 why Defendants’ supposed 99% completion rate fails to deprive Plaintiffs of standing. Lastly, the  
6 Court explains why Plaintiffs’ injuries are still traceable and redressable.

7 **1. Plaintiffs are likely to lose federal funds that turn on census data.**

8 The administrative record shows that the Replan will likely lead to an undercount that  
9 results in “loss of crucial federal funds for programs that affect [Plaintiffs’] daily life.” A. Garcia  
10 Decl. ¶ 4. The Supreme Court has specifically agreed that the loss of federal funding “is a  
11 sufficiently concrete and imminent injury to satisfy Article III.” *Dep’t of Commerce v. New York*,  
12 139 S. Ct. at 2565. Thus, the Court agrees that the possible loss of federal funds is a sufficient  
13 injury to establish Article III standing as explained below.

14 Local government Plaintiffs are recipients of multiple sources of federal funding that turn  
15 on census data. King County, Washington; the City of Los Angeles; and Harris County, Texas are  
16 leading examples. The Replan’s shortened schedule for data collection and processing will likely  
17 diminish each locality’s funding because each locality has many hard to count persons who risk  
18 being undercounted. M. Garcia Decl. ¶¶ 7–8; Dively Decl. ¶ 5; Briggs Decl. ¶¶ 7, 11; *see also*  
19 Hillygus Decl. ¶¶ 12, 19, 39 (explaining the statistics of undercounting subpopulations).

20 Specifically, the Court notes the following:

- 21 • In King County, three-quarters of the County’s record population growth of 15% since  
22 2010 is attributable to “populations that are less likely to self-respond to the census.”  
23 Dively Decl. ¶ 5. As a result, “[s]hortening the enumeration period risks creating a  
24 population undercount.” *Id.* Any undercount would reduce King County’s allocation of  
25 funds “proportionately disbursed by census population counts.” *Id.* ¶ 7. These funds  
26 include Community Development Block Grants, HOME Investment Partnership Program,  
27 and Emergency Solutions Grants from the U.S. Department of Housing and Urban  
28 Development. *Id.* ¶ 7. Transit Formula Grants to the Seattle region, of which King County  
is a part, also turn on census data, and totaled \$108 million in fiscal year 2019.

- 1 • Los Angeles County is “the hardest to count in the nation.” M. Garcia Decl. ¶ 7. 57% of  
2 the residents in the City of Los Angeles, which is home to roughly 4 million people, live in  
3 census block groups that are hard or very hard to count. *Id.* As a result, Los Angeles’ self-  
4 response rate of 54.5% (as of August 19, 2020) is well below the city’s 2010 response rate  
5 of 68% and the state’s 2020 response rate of 65.9%.
- 6 • “[T]he City of Los Angeles receives tens of millions of dollars from the federal  
7 government each year based upon the ratio of population derived from the decennial  
8 census.” Westall Decl. ¶ 35. In times of national emergency, cities such as Los Angeles  
9 receive relief based on census population. *Id.* ¶ 34 (discussing \$20 million received under  
10 the Coronavirus Aid, Relief, and Economic Security Act, or CARES Act).
- 11 • In Harris County, the Replan’s shortening of the self-response and NRFU timelines risks  
12 causing “unprecedented undercounts in the 2020 Census.” Briggs Decl. ¶ 11.  
13 “[A]pproximately \$90,529,359 of the grants expended by Harris County in FY2019  
14 depended on accurate census data.” Wilden Decl. ¶ 5. Among the grants affected are those  
15 that enable “sustainable financing of local health departments” such as Harris County  
16 Public Health, which has helped manage COVID-19 for approximately 4.7 million people.  
17 Shah Decl. ¶¶ 4, 8.

18 An undercount in any locality matters greatly. Even a *small* undercount of a *subset* of the  
19 hard to count population would result in the loss of federal funding. *See Dep’t of Commerce v. New*  
20 *York*, 139 S. Ct. at 2565 (“[I]f noncitizen households are undercounted by as little as 2% . . .  
21 [states] will lose out on federal funds”). Thus, like in *Department of Commerce v. New York*,  
22 Plaintiffs that receive federal funds based on census population suffer “a sufficiently concrete and  
23 imminent injury to satisfy Article III.” *Id.*

## 2. Plaintiffs will likely be deprived of their fair share of political representation.

24 Plaintiffs allege that the undercount resulting from the Replan will likely result in an unfair  
25 apportionment that will deprive local government Plaintiffs, individual Plaintiffs, and members of  
26 organizational Plaintiffs of their fair share of representation. The resulting “threat of vote  
27 dilution,” whether Congressional or intrastate, is an injury in fact. *Dep’t of Commerce v. U.S.*  
28 *House of Representatives*, 525 U.S. 316, 331–32 (1999).

For example, given the historically low census response rates in the City of Los Angeles  
and City of Salinas in California, the Replan creates a substantial risk that their residents will not  
be counted, and a substantial risk of diminished political representation. *See* M. Garcia Decl. ¶¶ 8–

1 15; Gurmilan Decl. ¶¶ 6, 8–14. Specifically:

- 2 • In the City of Los Angeles, the Replan “will result in extreme inaccuracy” because it would  
 3 leave “just over six weeks to complete enumeration of roughly half of the exceptionally  
 4 diverse households of the nation’s second-most-populous city—in the midst of a once-in-a-  
 5 lifetime pandemic.” M. Garcia Decl. ¶ 8; *see* Westall Decl. ¶ 36 (stating it is “likely” that  
 6 undercounts will “disproportionally impact Los Angeles” and “cause the City to miss out  
 7 on a portion of [] funding for an entire decade”).
- 8 • Similarly, the City of Salinas comprises 38.5% of Monterey County’s hard to count  
 9 population, and the City’s response rate is 9.5% below its response rate from the 2010  
 10 Census and 8% below the current state average. Gurmilan Decl. ¶ 6.

11 The undercount wrought by the Replan will not only “compromise the success of the  
 12 apportionment count” for Congressional representation, but also “severely compromise the quality  
 13 of the redistricting data” for state and local representation. Louis Decl. ¶ 43; *see* Thompson Decl.  
 14 ¶ 23. In fact, it is undisputed that census data is used to redraw district boundaries for federal,  
 15 state, and local legislatures, and that drawing districts with unequal population can be unlawful.  
 16 *See, e.g.*, Westall Decl. ¶¶ 14–29. An undercount from a truncated self-response period, lower-  
 17 quality NRFU, and rushed data processing all mean that Plaintiffs’ federal, state, and local political  
 18 representation will be diminished. *See, e.g.*, Westall Decl. ¶¶ 27 (“[R]esidents in Council Districts  
 19 with large concentrations of undercounted residents would be denied equal representation.”); Soto  
 20 Decl. ¶ 11 (same); Ellis Decl. ¶ 12 (“An undercount on the 2020 Census will also put me at serious  
 21 risk of political underrepresentation in the U.S. Congress, and in the Texas legislature.”).

22 **3. The Replan will likely degrade census data that Plaintiffs use to deploy  
 23 services and allocate capital.**

24 The local government Plaintiffs allege that the Replan will degrade granular census data  
 25 that they rely on to deploy services and allocate capital. “[B]y virtue of the Constitution and the  
 26 Census Act, it is, of course, the federal government’s job to collect and distribute accurate federal  
 27 decennial census data.” *New York v. Trump*, No. 20-CV-5770, 2020 WL 5422959, at \*18 (S.D.N.Y.  
 28 Sept. 10, 2020) (three-judge court), *vacated on ripeness grounds*, 592 U.S. \_\_\_\_ (U.S. Dec. 18,  
 2020) (per curiam); *see also* Departments of Commerce, Justice, and State, The Judiciary, and  
 Related Agencies Appropriations Act, 1998, § 209, Pub. L. No. 105-119, 111 Stat. 2440, 2481

1 (1997) (“1998 Appropriations Act”) (codified at 13 U.S.C. § 141 note) (“Congress finds that . . . it  
2 is essential that the decennial enumeration of the population be as accurate as possible, consistent  
3 with the Constitution and laws of the United States . . .”).

4 The degradation of data is thus an informational injury analogous to those that have  
5 supported Article III standing. *See New York v. U.S. Dep’t of Commerce*, 351 F. Supp. 3d 502, 611  
6 (S.D.N.Y. 2019) (finding that “degradation in the quality of census data” supported standing),  
7 *aff’d in part, rev’d in part and remanded sub nom. Dep’t of Commerce v. New York*, 139 S. Ct.  
8 2551 (2019); *see also, e.g., Fed. Election Comm’n v. Akins*, 524 U.S. 11, 21 (1998) (collecting  
9 cases finding that “deprivation of information” supports standing); *Robins v. Spokeo, Inc.*, 867  
10 F.3d 1108, 1114 (9th Cir. 2017) (finding standing partly because a statute, 15 U.S.C. § 1681e(b),  
11 requires “follow[ing] reasonable procedures to assure maximum possible accuracy” of  
12 information). For instance, King County, Los Angeles, and Harris County all rely on granular  
13 census data:

- 14 • King County, Washington uses census data to place public health clinics, plan  
15 transportation routes, and mitigate hazards. Dively Decl. ¶ 6.
- 16 • The City of Los Angeles uses “reliable, precise, and accurate population count data” to  
17 deploy the fire department, schedule trash-pickups, and acquire or improve park properties.  
18 Westall Decl. ¶ 32.
- 19 • Recently, Harris County has used census data “to estimate the impact of COVID-19 to  
20 specific communities at a granular level,” which has helped the county tailor  
21 “communications in multiple languages with audience and age-specific prevention  
22 messaging and share information about availability of testing or vaccine sites.” Shah Decl.  
23 ¶ 7. Inaccurate or incomplete data would “increase risk of misinterpreting the prevalence  
24 of the disease in disproportionately impacted communities.” *Id.*

25 In sum, the Replan’s harm to the accuracy of census data will harm Plaintiffs’ concrete uses of the  
26 data.

27 **4. Plaintiffs have diverted and may continue to divert resources to mitigate the  
28 undercount that will likely result from the Replan.**

Plaintiffs have diverted resources to mitigate the undercounting that will likely result from  
the Replan. This diversion of resources is a concrete injury-in-fact. *See, e.g., Am. Diabetes Ass’n v.*

1 *U.S. Dep’t of Army*, 938 F.3d 1147, 1154 (9th Cir. 2019) (finding injury-in-fact where plaintiffs  
2 “had altered their resource allocation” that they would have spent on some other organizational  
3 purpose).

4 The City of Salinas, Harris County, Black Alliance for Just Immigration, League of  
5 Women Voters, and National Urban League detail many examples of diverted resources:

- 6 • The City of Salinas already promoted the October 31 deadline “on social media and in  
7 thousands of paper flyers.” Gurmilan Decl. ¶¶ 11–12. Thus, “some residents who received  
8 the City’s messaging will fail to respond before the R[eplan] deadline because the City has  
9 limited remaining resources to correct what is now misinformation.” *Id.* ¶ 12. Moreover,  
10 the City “advertis[ed] for census enumerator job listings because traditional applicant  
11 groups like senior citizens have concerns about the risk of catching COVID-19. With fewer  
12 enumerators working, every extra day the City ha[d] to use [] existing staff to support the  
13 count . . . .” *Id.* ¶ 13.
- 14 • Harris County “participated in over 150 events,” including “food distribution events,”  
15 during which it “announced the October 31, 2020 deadline for the 2020 Census.” Briggs  
16 Decl. ¶ 12. Consequently, Harris County “expend[ed] additional resources to clear  
17 confusion about the last date for self-response during the Census, to ensure that people  
18 who have not responded are counted in time.” *Id.* ¶ 16.
- 19 • The Black Alliance for Just Immigration already “publicized the October 31 deadline for  
20 self-response during digital events between April and July” and diverted resources to  
21 publicize the Replan’s September 30 deadline. Gyamfi Decl. ¶¶ 13–14.
- 22 • The League of Women Voters “had to spend time and financial resources” developing and  
23 distributing public education materials on the Replan timeline. Stewart Decl. ¶ 12.
- 24 • The National Urban League has similarly had “to divert resources from other programs and  
25 projects” to “alleviate the confusion” about the change in deadlines. Green Decl. ¶ 15.

26 Indeed, the Census Bureau boasted of how its communications program was “more  
27 integrated than ever before” with Plaintiffs such as National Urban League. Fontenot Decl. ¶ 40.  
28 Mitigating those counterproductive communications and a likely undercount is only harder in the  
midst of a pandemic. *E.g.*, M. Garcia Decl. ¶¶ 14–15; Gurmilan Decl. ¶¶ 11–14; Briggs Decl.  
¶¶ 11–12, 15–17. The result that Plaintiffs have diverted and may continue to divert resources  
from their organizational mission to mitigate the effects of the Replan.

**5. Defendants' supposed >99% completion rate fails to render Plaintiffs' injuries speculative.**

Faced with these detailed allegations of four distinct injuries, Defendants make a new argument in their motion to dismiss: that the >99% completion rate for data collection renders Plaintiffs' injuries speculative. *See* Mot. at 15–16. Specifically, Defendants argue that Plaintiffs have inadequately alleged a “differential undercount” because at the end of data collection on October 15, 2020, the Census Bureau had “reached completion rates of greater than 99% in every State and in the District of Columbia.” *Id.* at 15. Defendants' argument is meritless in five ways.

First, Plaintiffs adequately allege that the asserted completion rates are unreliable. Detailed allegations in the SAC and public reporting cast doubt on the completion rates. Below are just some problems with how the Bureau reached an asserted completion rate of >99%, according to the SAC:

- The Bureau was short over 80,000 enumerators during the data collection period. SAC ¶ 376. Yet the Bureau made up for this shortfall by claiming a 53% increase in enumerator efficiency in the midst of a pandemic. *Id.* ¶ 378. Driving this “impossible jump in enumerator productivity” was “a massive decrease in in-person visits”; “changed information requirements”; and “enumerators being told to act improperly and cut corners.” *Id.* ¶ 379.
- The decrease in in-person visits led to the “dramatically increased” use of telephone calls, proxies, and administrative records. *Id.* ¶ 382. Several Census Field Supervisors (“CFSs”) reported that households were marked as “completed” without explanation or closed for “political” reasons. *Id.* ¶¶ 382, 384.
- Many enumerators were instructed to falsify data to inflate the completion rate. For example, a CFS in San Francisco was verbally instructed to take shortcuts that violated the Bureau's manuals. *Id.* ¶ 405.

As for public reporting, the Associated Press has reported allegations by 12 enumerators that they were “instructed to make up answers about households where they were unable to get information.” Mike Schneider, *Census Bureau denies fake data allegations by census workers* (Nov. 10, 2020), <https://apnews.com/article/indiana-only-on-ap-census-2020-a4f3d96a3118f39774fb495b52b4b10a>. Text messages from a census supervisor have corroborated similar allegations. *See* Mike Schneider, *Texts: US census manager told counters to use fake*

1 *answers* (Nov. 24, 2020), [https://apnews.com/article/us-census-manager-counters-fake-answers-](https://apnews.com/article/us-census-manager-counters-fake-answers-b0ecdec4d6fa4fe3a0989e5702c528ce)  
 2 [b0ecdec4d6fa4fe3a0989e5702c528ce](https://apnews.com/article/us-census-manager-counters-fake-answers-b0ecdec4d6fa4fe3a0989e5702c528ce). Thus, whether the completion rate is reliable warrants  
 3 discovery and briefing, not dismissal of the SAC.

4 Second, even if the Bureau truly reached 99% completion in each State, Plaintiffs likely  
 5 still suffer a differential undercount *within* states. For instance, Plaintiffs allege that the Bureau’s  
 6 internal documents show “extremely low completion rates in tribal lands.” SAC ¶ 368. Those  
 7 documents also allegedly show that 24 census offices had low completion rates as of September  
 8 28, 2020. *Id.* Nothing so far suggests that the Bureau was able to close the gap in completion rates  
 9 between September 28 and October 15, 2020.

10 Third, this Court’s Injunction Order is what made possible Defendants’ asserted  
 11 completion rate. Recall that the Bureau’s internal documents insisted that “[i]n order to achieve an  
 12 acceptable level of accuracy, at least 99% of Housing Units in every state must be resolved.”  
 13 DOC\_10275–76. On September 30, 2020—the day on which data collection would have ended  
 14 but for the Injunction Order—16 States and the District of Columbia were still under 99%  
 15 completion. *See* U.S. Census Bureau, *2020 Census Housing Unit Enumeration Progress by State*  
 16 (Oct. 1, 2020 report), [https://2020census.gov/content/dam/2020census/news/daily-nrfu-rates/nrfu-](https://2020census.gov/content/dam/2020census/news/daily-nrfu-rates/nrfu-rates-report-10-01.pdf)  
 17 [rates-report-10-01.pdf](https://2020census.gov/content/dam/2020census/news/daily-nrfu-rates/nrfu-rates-report-10-01.pdf). Thus, Defendants would have missed the completion rate requirement  
 18 despite Associate Director Fontenot’s declarations under penalty of perjury that they would not.

19 Specifically, in his September 4, 2020 declaration, Associate Director Fontenot averred that  
 20 by September 30, 2020, “the Census Bureau intends to meet a similar level of household responses  
 21 as in prior censuses, meaning that *we will resolve 99% of the cases in each state.*” Fontenot Decl.  
 22 ¶ 65, ECF No. 81-1 (emphasis added).

23 However, on September 17, 2020, Associate Director Fontenot stated to the Census  
 24 Scientific Advisory Committee (“CSAC”) that he “did not know whether Mother Nature would  
 25 allow us to meet the September 30 date.” ECF No. 196-1 ¶ 14. Associate Director Fontenot cited  
 26 “major West Coast fires and air quality issues that have accelerated since September 11, and the  
 27 current impacts of Hurricane Sally across the states of Louisiana, Mississippi, Alabama, the

1 Florida panhandle area, parts of Georgia, and South Carolina.” *Id.*; accord Census Bureau, *Census*  
 2 *Scientific Advisory Committee Fall Virtual Meeting* at 1:36:55–1:37:10 (Sept. 17, 2020),  
 3 <https://www.census.gov/about/cac/sac/meetings/2020-09-meeting.html> (“It is not within my vision  
 4 capabilities to be able to forecast -- That’s an unknown at this time . . . and I really can’t project  
 5 whether Mother Nature will let us finish.”).

6 Nonetheless, in his September 22, 2020 declaration, Associate Director tried to disavow  
 7 his inability to forecast whether the Bureau could meet the September 30, 2020 deadline.  
 8 Associate Director Fontenot averred that, despite Mother Nature, the Bureau still had an “urgent  
 9 need to revert to our planned completion strategies [under the Replan] to meet the statutory  
 10 deadline.” *Id.* ¶ 15.

11 If the Census Bureau had in fact reverted to “planned completion strategies,” the Census  
 12 Bureau would have missed the completion rate requirement detailed above. Even so, Defendants  
 13 now argue—with little sense of irony—that although Plaintiffs never had standing to begin with,  
 14 the Injunction Order was so effective that it mooted this case.

15 Fourth, even if the Bureau collected enough data to hit a high completion rate, the Bureau’s  
 16 severely streamlined data-processing may harm Plaintiffs. Opp’n at 7. As the Bureau’s former  
 17 chief data scientist has averred, “[i]nvariably, streamlining will degrade quality, because the  
 18 systems and procedures that have been developed and tested over the decade are designed to be  
 19 both necessary and sufficient.” Louis Decl. ¶ 32, ECF No. 36. Current Bureau advisors have  
 20 echoed this concern too. As the Bureau’s Census Scientific Advisory Committee reported on  
 21 November 12, 2020, “adequate de-duplication procedures for college students, retirees, and others  
 22 require additional time, not less.” Memo. from Allison Plyer, Chair, Census Sci. Advisory Comm.  
 23 to Steven Dillingham, Dir., U.S. Census Bureau, *Recommendations and Comments to the Census*  
 24 *Bureau* at 3 (Nov. 12, 2020). Yet the current rush to process data will likely undercount (in relative  
 25 terms) hard-to-count groups that comprise a disproportionate share of Plaintiffs’ members and  
 26 residents.

27 Lastly, Defendants fail to adequately address data degradation injury (from lower quality

1 census data that Plaintiffs use for various purposes) and diverted resource injury (from resources  
 2 spent to mitigate the undercount). Defendants merely reassert that these are speculative self-  
 3 inflicted harms. Mot. at 17. However, the un rebutted evidence in this case thus far shows that the  
 4 Replan will “significantly reduce the accuracy” of census data and has caused Plaintiffs to divert  
 5 resources to mitigate that harm. Injunction Order at 58; *see also, e.g.*, Louis Decl. ¶ 44  
 6 (“truncation of the time for field operations and data curation . . . will severely compromise the  
 7 quality of the census data”); Thompson Decl. ¶ 5 (“grave and material consequences for the 2020  
 8 Census”).

9 In sum, the completion of data collection fails to deprive Plaintiffs of standing. Rather,  
 10 Plaintiffs are still likely to lose federal funds; political representation; accurate data; and diverted  
 11 resources as a result of the Replan.

12 **6. Plaintiffs’ injuries are fairly traceable to the Replan and redressable by the**  
 13 **Court.**

14 The above harms are “concrete, particularized, and actual or imminent.” *Dep’t of*  
 15 *Commerce v. New York*, 139 S. Ct. at 2565 (quoting *Davis v. Fed. Election Comm’n*, 554 U.S. 724,  
 16 733 (2008)). They are also “fairly traceable to the defendant’s challenged behavior; and likely to  
 17 be redressed by a favorable ruling.” *Id.* (quoting *Davis*, 554 U.S. at 733). As the Supreme Court  
 18 stressed last year, “Article III ‘requires no more than de facto causality.’” *Id.* at 2566 (quoting  
 19 *Block v. Meese*, 793 F.2d 1303, 1309 (D.C. Cir. 1986) (Scalia, J.)). Defendants’ conduct need not  
 20 be “the very last step in the chain of causation.” *Bennett v. Spear*, 520 U.S. 154, 169 (1997).

21 Here, Plaintiffs’ theory of standing rests “on the predictable effect of Government action on  
 22 the decisions of third parties”—that is, the predictable harms of accelerating census deadlines and  
 23 curtailing key operations, without warning, after months of publicly operating under a plan  
 24 tailored to COVID-19. *Id.* The relief Plaintiffs seek would redress those harms. Specifically,  
 Plaintiffs ask the Court to grant the following relief:

- 25 • Declare that Defendants’ promulgation of the Replan, and corresponding revocation of the  
 26 COVID-19 Plan is unconstitutional under the Enumeration Clause, and unlawful under the  
 27 Administrative Procedure Act.

- Vacate the Replan, thereby reinstating the COVID-19 Plan.
- Enjoin Defendants from implementing or effectuating the Replan or its constituent parts and enjoin Defendants from unlawfully interfering with the implementation or effectuation of the COVID-19 Plan or its constituent parts.

SAC ¶¶ 486–88. Enjoining Defendants and reinstating the COVID-19 Plan, for instance, would prevent Defendants from trying to “accomplish five months of data processing in ten weeks”—a rush that threatens to render the apportionment numbers “constitutionally and statutorily infirm.” SAC ¶ 420. Courts have granted similar relief in other census litigation. *See, e.g., Dep’t of Commerce v. U.S. House of Representatives*, 525 U.S. at 328–34 (affirming injunction against the planned use of statistical sampling to prevent apportionment harms, among others); *New York v. United States Dep’t of Commerce*, 351 F. Supp. 3d at 675 (issuing injunction to prevent “the loss of political representation and the degradation of information”). Thus, Plaintiffs seek relief that redresses their injuries—injuries which are traceable to the Replan.

In response, Defendants again argue that “the relief Plaintiffs seek—violation of [statutory] deadlines by court-ordered reinstatement of the COVID-19 Plan—is not redress the Court can provide.” Mot. at 11 (citing SAC ¶¶ 487–88). Defendants are incorrect in three ways. First, the Ninth Circuit has already held that this Court can afford Plaintiffs’ relief “[i]f the Bureau meets the December 31 [statutory] date by using procedures that violate any accuracy requirement embedded in the Enumeration Clause, or proceeds in an arbitrary and capricious manner.” *National Urban League II*, 977 F.3d at 781. Specifically, “existing data can be reprocessed.” *Id.* This remedy would avoid the problem of “*requir[ing]* the government to continue to ignore the December 31 timeline for completing the tabulation.” *Id.* at 780 (emphasis in original).

Second, given the case schedule, the Court would not issue a remedy until after the December 31 deadline has passed. *See* ECF No. 357 at 2 (setting summary judgment hearing on February 18, 2021, and bench trial on March 19, 2021). Thus, no remedy would require Defendants to violate the December 31 deadline. Defendants might have overlooked this point because the Court set the case schedule after Defendants filed their motion to dismiss.

Third, Defendants will miss the December 31 deadline no matter what the Court does. On

1 November 30, 2020, Defendants represented to the Supreme Court that “we are not currently on  
 2 pace to send the report to the President by the year-end statutory deadline.” Oral Arg. Tr. at 6:16–  
 3 7:3, *Trump v. New York*, No. 20-366 (U.S. Nov. 30, 2020).

4 All told, Plaintiffs suffer injuries in fact that are fairly traceable to the Replan and  
 5 redressable by the relief Plaintiffs seek. Plaintiffs thus still have Article III standing.

6 **C. Plaintiffs’ claims are ripe for adjudication.**

7 After months of litigation—including appeals to the Ninth Circuit and the Supreme  
 8 Court—Defendants now argue that this case is not ripe for adjudication. Specifically, Defendants  
 9 invoke constitutional and prudential ripeness. Defendants’ constitutional ripeness argument  
 10 merely echoes their standing argument and fails on the same grounds detailed above. *See* Mot. at  
 11 18 (“[F]or the same reasons that Plaintiffs have not sufficiently alleged injury-in-fact . . .  
 12 [Plaintiffs’] claims fail to satisfy constitutional ripeness requirements.”).

13 As for prudential ripeness, Defendants make two meritless arguments. First, Defendants  
 14 argue that “[e]valuating Plaintiffs’ claims of inaccuracy and disproportionate undercount at this  
 15 juncture is not an inquiry fit for judicial decision.” Mot. at 18. Supreme Court precedent forecloses  
 16 Defendants’ argument. For instance, in last year’s litigation about the 2020 Census’s citizenship  
 17 question, the Supreme Court adjudicated Enumeration Clause and APA claims without waiting for  
 18 undercount-related harms to materialize. *See New York*, 139 S. Ct. at 2565–66. This Court follows  
 19 suit for the Enumeration Clause and APA claims here. Similarly, in adjudicating a challenge to the  
 20 2000 Census, the Supreme Court held that “the case [was] ripe for review” even though the case  
 21 had been filed two years before the 2000 Census concluded. *Dep’t of Commerce v. U.S. House of*  
 22 *Representatives*, 525 U.S. 316, 328 (1999). There, the Supreme Court relied on a statute that  
 23 creates a cause of action for “any person aggrieved by the use of any statistical method . . . in  
 24 connection with the [] census.” *Id.* (quoting 1998 Departments of Commerce, Justice, and State,  
 25 the Judiciary, and Related Agencies Appropriations Act, § 209, 111 Stat. 2481). Here, Plaintiffs  
 26 also challenge statistical methods in connection with the census. *See, e.g., SAC ¶¶ 279–88* (“The  
 27 Replan Did Not Account for Federal Statistical Guidelines”).

1           Second, Defendants argue that “there is no conceivable hardship to Plaintiffs from  
2 withholding consideration of their claims.” Mot. at 18. Not so. The longer Plaintiffs must wait for  
3 potential relief, the more harm they will suffer. Even under the Court’s current expedited case  
4 schedule, there is no time for delay. The earliest Plaintiffs could receive relief is almost certainly  
5 after congressional apportionment. The summary judgment hearing is set for February 18, 2021,  
6 and a bench trial is set for March 11, 2021. By either date, presumably Defendants will have  
7 determined the results of the 2020 Census.

8           Moreover, the schedule leaves only three to six weeks for the Court to render judgment  
9 before the April 1, 2021 redistricting deadline. Granting judicial relief after redistricting would be  
10 more difficult than granting relief before, as this Court has held and as Defendants have  
11 represented to the Supreme Court. *See, e.g.*, ECF No. 372 (discussing “the difficulty of granting  
12 relief after the April 1, 2020 deadline for the Secretary’s transmittal of redistricting data to the  
13 states”). Defendants have specifically represented to the Supreme Court that the 2020 Census must  
14 conclude by April 2021 because dozens of states have “contingent redistricting deadlines.” Defs.  
15 Reply in Support of App. for a Stay at 11, *Ross v. National Urban League*, No. 20A62 (U.S. Oct.  
16 10, 2020). It is thus illogical for Defendants to argue that this suit should be dismissed entirely as  
17 unripe—and refiled by Plaintiffs only months later.

18           The Supreme Court’s recent decision in *Trump v. New York* is not to the contrary. No. 20-  
19 366, 592 U.S. \_\_\_, 2020 WL 7408998 (U.S. Dec. 18, 2020) (per curiam); *see also* ECF No. 394  
20 (“In evaluating Defendants’ motion to dismiss, the Court should consider today’s Supreme Court  
21 decision in *Trump v. New York*[.]”). The *New York* Court held that the lawsuit against the  
22 President’s July 21, 2020 Memorandum on Excluding Illegal Aliens from the Apportionment Base  
23 Following the 2020 Census is “not suitable for adjudication at this time.” Slip op. at 7. The  
24 Supreme Court reasoned that in *New York*, “[u]nlike other pre-apportionment challenges, the  
25 Secretary has not altered census operations in a concrete manner that will predictably change the  
26 count.” *Id.* at 5. The *New York* Court also reasoned that “the [*New York*] dispute involves the  
27 apportionment process, which remains at a preliminary stage.” *Id.*

1           The instant case, by contrast, challenges concrete alterations to census operations that will  
 2           predictably change the count. These concrete alterations include, for example, the Replan’s  
 3           dramatic compression of time for data collection and data processing. Self-response compressed  
 4           from 33.5 weeks to 29 weeks, with the deadline advancing from October 31 to September 30.  
 5           Fontenot Decl. ¶ 100. NRFU compressed from 11.5 weeks to 7.5 weeks, with the deadline  
 6           advancing from October 31 to September 30. Data processing was halved from 26 weeks to 13  
 7           weeks, with the deadline advancing from April 30, 2021 to December 31, 2020.

8           Moreover, as just discussed, the earliest that Plaintiffs could receive relief is February 18,  
 9           2021, the date of the summary judgment hearing. At that point, the apportionment process will no  
 10          longer be “at a preliminary stage.” *New York*, 592 U.S. \_\_\_\_ (slip op. at 5). Rather, apportionment  
 11          will likely be complete. In sum, Plaintiffs’ claims are ripe for adjudication.

12           **D. The Replan still constitutes agency action.**

13           Defendants’ three remaining arguments are against the reviewability of Plaintiffs’ APA  
 14           claims, not Plaintiffs’ Enumeration Clause claim. All three arguments rehash what this Court and  
 15           the Ninth Circuit have already rejected. To start, Defendants again argue that the Replan is not  
 16           reviewable because it is not a discrete “agency action.” Mot. At 20. They thus claim that Plaintiffs’  
 17           suit is “an improper, programmatic attack on the Bureau’s efforts to conduct the 2020 Census.” *Id.*  
 18           The Court and the Ninth Circuit disagree. *See National Urban League II*, 977 F.3d at 776 (holding  
 19           that Defendants “do[] not have a strong likelihood” of success on their agency action argument).  
 20           The Replan is agency action.

21           “The bite in the phrase ‘final action’ . . . is not in the word ‘action,’ which is meant to cover  
 22           comprehensively every manner in which an agency may exercise its power.” *Whitman v. Am.*  
 23           *Trucking Associations*, 531 U.S. 457, 478 (2001) (citations omitted). Thus, agency action is  
 24           broadly defined to include “the whole or part of an agency rule, order, license, sanction, relief, or  
 25           the equivalent or denial thereof, or failure to act.” 5 U.S.C. § 551(13). Each word in that definition  
 26           has its own expansive definition. A “rule,” for example, includes “the whole or a part of an agency  
 27           statement of general or particular applicability and future effect designed to implement, interpret,

1 or prescribe law or policy or describing the organization, procedure, or practice requirements of an  
2 agency.” *Id.* § 551(4).

3 To be sure, a reviewable agency action must be one that is “circumscribed” and “discrete.”  
4 *Norton v. S. Utah Wilderness All.*, 542 U.S. 55, 62–63 (2004). This requirement “precludes [a]  
5 broad programmatic attack” on an agency’s operations. *Id.* at 64. Defendants thus analogize this  
6 case to *NAACP v. Bureau of the Census*, 945 F.3d 183 (4th Cir. 2019). Mot. at 21.<sup>5</sup>

7 In *NAACP*, the plaintiffs brought a challenge in 2018 to the census “methods and means,”  
8 and “design choices.” *NAACP*, 945 F.3d at 186. The *NAACP* plaintiffs challenged as insufficient  
9 the numbers of enumerators, the networks of area census offices, the Bureau’s plan to rely on  
10 administrative records, and partnership program staffing. *Id.* at 190. The Fourth Circuit found that  
11 “[s]etting aside’ one or more of these ‘choices’ necessarily would impact the efficacy of the  
12 others, and inevitably would lead to court involvement in ‘hands-on’ management of the Census  
13 Bureau’s operations.” *Id.* (citing *S. Utah Wilderness All.*, 542 U.S. at 66–67). In concluding that  
14 there was not final agency action, the Fourth Circuit emphasized that its holding was “based on the  
15 broad, sweeping nature of the allegations that the plaintiffs have elected to assert under the APA.”  
16 *Id.* at 192.

17 *NAACP* is inapposite for two reasons. First, the relief Plaintiffs seek here would not  
18 “inevitably [] lead to court involvement in ‘hands-on’ management of the Census Bureau[.]” *Id.* at  
19 191. Plaintiffs do not ask the Court to manage the Bureau’s day-to-day operations or to enforce  
20 free-floating standards of “sufficiency.” See *NAACP*, 945 F.3d at 191 (quoting claims of  
21 “insufficient network of area census offices,” “insufficient partnership program staffing,”  
22 “insufficient testing of ‘new protocols,’” and more). Rather, Plaintiffs challenge the Defendants’  
23 failure to consider important aspects of the problem and lack of reasoned explanation for the  
24

---

25 <sup>5</sup> Unlike in their opposition to the preliminary injunction motion, Defendants do not analogize this  
26 lawsuit to *Lujan v. Nat’l Wildlife Fed’n*, 497 U.S. 871 (1990). The Court and the Ninth Circuit  
27 explained why *National Wildlife* was inapposite. See Injunction Order at 31–32 (distinguishing  
28 *National Wildlife*); *Nat’l Urban League II*, 977 F.3d at 776 (same).

1 Bureau's change in position. Reply at 14. *See, e.g., Motor Vehicle Mfrs. Ass'n of U.S., Inc. v. State*  
 2 *Farm Mut. Auto. Ins. Co.*, 463 U.S. 29, 52 (1983) (finding that agency's explanation for rescission  
 3 was not the product of reasoned decisionmaking); *Encino Motorcars, LLC v. Navarro*, 136 S. Ct.  
 4 2117, 2126 (2016) (setting aside agency's "change in position" for lacking reasoned explanation).

5 Second, the Replan is a circumscribed, discrete agency action. Indeed, Defendants treated  
 6 the Replan accordingly. Defendants named it the "Replan" or "Replanned Operational Schedule."  
 7 *E.g.*, DOC\_10276 (version of August 3, 2020 slide deck identified as key by the parties);  
 8 DOC\_8929 (July 30, 2020 email from Barbara LoPresti, Chief of the Decennial Information  
 9 Technology Division, to senior officials discussing "this proposed replan"); DOC\_10066 (email  
 10 thread titled "Replan" with senior officials); DOC\_11918 (August 3, 2020 email to the Chief of  
 11 Staff for the Deputy Secretary of Commerce with subject "Revised Replan Deck").

12 The Secretary directed the Bureau to develop the Replan. *See, e.g.*, August 3 Press Release,  
 13 ECF No. 37-1 ("directed by the Secretary"). In response to the Secretary's direction, the Bureau  
 14 presented the Replan to the Secretary in a single slide deck. *See, e.g.*, DOC\_10276. The Secretary  
 15 made a single explicit decision to adopt the Replan. Fontenot Decl. ¶ 85. Census Bureau Director  
 16 Dillingham announced the Replan in a single press release on August 3, 2020. ECF No. 37-1.  
 17 Defendants consistently treated the Replan as a circumscribed, discrete agency action. As the  
 18 Ninth Circuit explained, "[u]nlike in *NAACP*[], Plaintiffs challenge the decisionmaking process  
 19 that went into the decision in the Replan to greatly accelerate the census process over the COVID-  
 20 19 Plan, not specific 'design choices' within that plan." *National Urban League II*, 977 F.3d at  
 21 776.

22 Again, as Justice Scalia stated: "[t]he bite in the phrase 'final action' . . . is not in the word  
 23 'action,' which is meant to cover comprehensively every manner in which an agency may exercise  
 24 its power. It is rather in the word 'final.'" *Whitman*, 531 U.S. at 478 (citations omitted). It is to that  
 25 finality requirement that the Court now turns.

26 **E. The Replan still constitutes final agency action.**

27 Defendants again argue that even if the Replan were agency action, "it is not 'final' agency  
 28

1 action that is subject to judicial review under § 704.” Mot. at 22. “To maintain a cause of action  
2 under the APA, a plaintiff must challenge ‘agency action’ that is ‘final.’” *Wild Fish Conservancy v.*  
3 *Jewell*, 730 F.3d 791, 800 (9th Cir. 2013) (citing *Norton*, 542 U.S. at 61–62).

4 An agency’s action is final if two conditions are met. First, the action “must mark the  
5 consummation of the agency’s decisionmaking process—it must not be of a merely tentative or  
6 interlocutory nature.” *Bennett*, 520 U.S. at 177–78. Second, the action “must be one by which  
7 ‘rights or obligations have been determined,’ or from ‘which legal consequences will flow.’” *Id.*  
8 (quoting *Port of Boston Marine Terminal Assn. v. Rederiaktiebolaget Transatlantic*, 400 U.S. 62,  
9 71 (1970)). Five years earlier, the Supreme Court found that the same two requirements applied in  
10 a census case. *Franklin*, 505 U.S. at 797 (the central question “is [1] whether the agency has  
11 completed its decisionmaking process, and [2] whether the result of that process is one that will  
12 directly affect the parties.”). Courts should take a “‘pragmatic’ approach” to finality. *U.S. Army*  
13 *Corps of Engineers v. Hawkes Co., Inc.*, 136 S. Ct. 1807, 1815 (2016) (quoting *Abbott*  
14 *Laboratories v. Gardner*, 387 U.S. 136, 149 (1967)).

15 The Replan is final agency action for purposes of APA review because the Replan meets  
16 both criteria, each of which the Court addresses in turn.<sup>6</sup> Indeed, the Ninth Circuit has already held  
17 that Defendants’ argument to the contrary is likely meritless. *See National Urban League II*, 977  
18 F.3d at 777 (analyzing finality).

19 **1. The Census Bureau completed its decisionmaking process: Defendants have**  
20 **adopted and implemented the Replan.**

21 As to the first factor of final agency action, which is “whether the agency has completed its  
22 decisionmaking process,” *Franklin*, 505 U.S. at 797, the Replan marks the consummation of the

---

23  
24 <sup>6</sup> In *Hawkes Co.*, the Supreme Court expressly reserved whether an agency action that satisfies  
25 only the first condition—consummation of the agency’s decisionmaking process—can still be  
26 final. 136 S. Ct. at 1813 n.2. The Supreme Court did not reach that question in *Hawkes Co.*  
27 because the agency action under review “satisfie[d] both prongs of *Bennett*.” *Id.* Similarly, the  
28 Replan satisfies both prongs. Thus, the Court need not decide whether the first condition alone  
would suffice to constitute a “final” agency action.

1 Bureau’s and Department of Commerce’s decisionmaking process because the Replan is “not  
2 subject to further agency review.” *Sackett v. EPA.*, 566 U.S. 120, 127 (2012); *see also Hawkes*, 136  
3 S. Ct. at 1813–14 (holding that an agency action was final because the determination was  
4 “typically not revisited”); *Fairbanks North Star Borough v. U.S. Army Corps of Engineers*, 543  
5 F.3d 586, 593 (9th Cir. 2008) (holding that an agency’s action was final where “[n]o further  
6 agency decisionmaking on the issue can be expected”). The Secretary made an explicit decision to  
7 adopt the Replan. August 3 Press Release; *see* Fontenot Decl. ¶ 85. The Bureau has implemented  
8 the Replan. No further agency decisionmaking will be conducted on the Replan.

9 *Norton v. Southern Utah Wilderness Alliance*, a decision cited by Defendants, is readily  
10 distinguishable from the instant case. *See* Mot. at 20 (citing *Norton*, 542 U.S. at 61–62). In *Norton*,  
11 the Supreme Court found that the plaintiffs’ challenges to the Bureau of Land Management’s land  
12 use plans failed. The *Norton* Court reasoned that the plans were not a “legally binding  
13 commitment” that were enforceable under the APA. 542 U.S. at 72. Specifically, the plaintiffs  
14 claimed that BLM “failed to comply with certain provisions in its land use plans,” which  
15 “describe[, for a particular area, allowable uses, goals for future condition of the land, and  
16 specific next steps.” 542 U.S. at 59, 67. The Federal Land Policy and Management Act of 1976  
17 “describes land use plans as tools by which ‘present and future use is *projected*.’” *Id.* at 69  
18 (emphasis in original) (quoting 43 U.S.C. § 1701(a)(2)).

19 Thus, the *Norton* Court observed that “[t]he implementing regulations make clear that land  
20 use plans are a *preliminary* step in the overall process of managing public lands—designed to  
21 guide and control future management actions and the development of subsequent, more detailed  
22 and limited scope plans for resources and uses.” *Id.* (emphasis added). As a result, “a land use plan  
23 is not ordinarily the medium for affirmative decisions that implement the agency’s  
24 ‘project[ions].’” *Id.* (quoting 43 U.S.C. § 1712(e)). Similarly, “the regulation defining a land use  
25 plan declares that a plan ‘is not a final implementation decision on actions which require further  
26 specific plans, process steps, or decisions under specific provisions of law and regulations.’” *Id.* at  
27 69–70. In sum, by contrast to a “final” agency action, the type of land use plan challenged by the

1 *Norton* plaintiff “is generally a statement of priorities; it guides and constrains actions, but does  
2 not (at least in the usual case) prescribe them.” *Id.* at 71.

3 Here, the Replan is not a “preliminary step” toward deciding the Census schedule. Nor is  
4 the Replan a “statement of priorities” that merely “guides and constrains actions.” *See id.* at 69,  
5 71. Instead, the Replan constitutes a commitment to terminate the collection of data, analyze that  
6 data, and report “[t]he tabulation of total population” to the President by December 31, 2020. 13  
7 U.S.C. § 141(b).

8 Moreover, termination of data collection is practically irreversible. In his September 5,  
9 2020 declaration, Defendants’ own declarant, Associate Director Fontenot, requested that if the  
10 Court enjoins Defendants, the Court do so earlier than later because it is difficult to rehire field  
11 staff who have been terminated:

12 Lack of field staff would be a barrier to reverting to the COVID Schedule were the  
13 Court to rule later in September. The Census Bureau begins terminating staff as  
14 operations wind down, even prior to closeout. Based on progress to date, as is  
15 standard in prior censuses, we have already begun terminating some of our  
16 temporary field staff in areas that have completed their work. It is difficult to bring  
17 back field staff once we have terminated their employment. Were the Court to  
18 enjoin us tomorrow we would be able to keep more staff on board than were the  
19 Court to enjoin us on September 29, at which point we will have terminated many  
20 more employees.

21 Fontenot Decl. at ¶ 98. Since that September 5 declaration, data collection has in fact stopped, and  
22 there is no indication it will resume before the Secretary reports apportionment figures to the  
23 President.

24 In sum, the Replan provides an accelerated end date for data collection (September 30,  
25 2020, but for the Injunction Order) and truncated data processing. Data collection stopped on  
26 October 15, 2020, and accelerated data processing is well underway. The Replan is thus the  
27 completion of Defendants’ decisionmaking process on how the 2020 Census will be conducted.

## 28 **2. The Replan directly affects the parties.**

As to the second factor of final agency action, which is whether an agency action “will  
directly affect the parties,” the Replan certainly does affect the parties and will continue to do so.

1 *Franklin*, 505 U.S. at 797; *see also Bennett*, 520 U.S. at 177–78 (holding that, “[a]s a general  
 2 matter,” a final action “must be one by which ‘rights or obligations have been determined,’ or from  
 3 which ‘legal consequences will flow’” (citation omitted)). The Court analyzes the Replan’s effect  
 4 on the Plaintiffs and Defendants then distinguishes Defendants’ main case, *Franklin v.*  
 5 *Massachusetts*.

6 **a. The Replan’s undercount will directly affect and harm Plaintiffs.**

7 The Replan “will directly affect” Plaintiffs and result in “legal consequences.” *Franklin*,  
 8 505 U.S. at 797; *Bennett*, 520 U.S. at 177–78. Specifically, the Replan will directly affect  
 9 Plaintiffs in three ways: (1) by undercounting hard to count populations; (2) barring governmental  
 10 Plaintiffs’ constituents and organizational Plaintiffs’ members from participating in the 2020  
 11 Census after October 15, 2020; and (3) exposing those same people to violations of federal law  
 12 and fines.

13 First, the Replan will likely undercount hard to count populations in the decennial census.  
 14 This undercount necessarily affects the Secretary’s “tabulation of total population by States” and  
 15 the President’s apportionment calculations, which “must be based on decennial census data alone.”  
 16 *New York*, 2020 WL 5422959, at \*26 (discussing text, legislative history, and the Executive’s  
 17 longstanding understanding of 13 U.S.C. § 141(a) and 2 U.S.C. § 2a(a)). As the Supreme Court  
 18 recently confirmed, “[t]he President in turn *must* transmit to Congress a ‘statement showing the  
 19 whole number of persons in each State, excluding Indians not taxed, *as ascertained’ under the*  
 20 *census.*” *New York*, 592 U.S. \_\_\_ (slip op. at 1–2) (emphasis added) (quoting 2 U.S.C. § 2a(a)). In  
 21 other words, the Replan will likely result in an undercount in both the numbers that the Secretary  
 22 reports to the States and the numbers that the President—who must draw on “decennial census  
 23 data”—reports to Congress.

24 That undercount, as discussed in the Court’s standing analysis above, injures Plaintiffs in  
 25 legally cognizable ways. For instance, an undercount harms the “crucial representational rights  
 26 that depend on the census,” *Dep’t of Commerce v. New York*, 139 S. Ct. at 2569, and deprives local  
 27 government Plaintiffs of federal funds to which they are entitled, *cf. City of Kansas City, Mo. v.*

1 *U.S. Dep't of Hous. & Urban Dev.*, 861 F.2d 739, 745 (D.C. Cir. 1988) (discussing procedural  
 2 rights arising under Community Development Block Grants, which at least King County and Los  
 3 Angeles receive). These harms and others will last through 2030, if not later. Congress has  
 4 determined as much by finding that:

5 the decennial enumeration of the population is a complex and vast undertaking, and  
 6 if such enumeration is conducted in a manner that does not comply with the  
 7 requirements of the Constitution or laws of the United States, it would be  
 8 impracticable for the States to obtain, and the courts of the United States to  
 provide, meaningful relief after such enumeration has been conducted.

9 1998 Appropriations Act, § 209(a)(8), 111 Stat. at 2480–81. Thus, because the Replan will likely  
 10 result in an inaccurate enumeration, the Replan is an action from which legal consequences will  
 11 flow.

12 Second, the Replan barred people who seek to participate in the Census—such as  
 13 governmental Plaintiffs' constituents and organizational Plaintiffs' members—from participating  
 14 after the early end of data collection on October 15, 2020. *See Sackett*, 566 U.S. at 126 (holding  
 15 that an agency action determined rights and obligations of property owners where it “severely  
 16 limit[ed] [the owners’] ability to obtain a permit . . . from [the agency]”); *Alaska, Dep't of*  
 17 *Environmental Conservation v. EPA*, 244 F.3d 748, 750 (9th Cir. 2001) (holding that an agency  
 18 action determined rights and obligations where its effect was to halt construction at a mine  
 19 facility). Under the Replan, data collection would have ended on September 30, 2020. The  
 20 Injunction Order would have extended data collection to October 31, 2020, but for the Supreme  
 21 Court's stay. Thus, many people were unable to participate despite their potential reliance on the  
 22 Census Bureau's previous, widely publicized representations that they could participate until  
 23 October 31, 2020. For example:

- 24 • The League of Women Voters has over 65,000 members across 800 state and local  
 25 affiliates. Stewart Decl. ¶ 4. Thus, “[w]hen the Census Bureau extended the deadline for  
 26 counting operations to October 31, 2020,” the League of Women Voters “published blog  
 27 posts advertising the new timeline,” “shared numerous letters with [ ] state and local  
 28 affiliates providing information about the new timeline,” and “publicized the deadline in  
 letters and [emails].” *Id.* ¶ 11.

- The City of Los Angeles is home to about 4 million people. M. Garcia Decl. ¶ 7. The City “conducted a public education campaign publicizing the October 31, 2020 date for self-response.” *Id.* ¶ 14. For example, the City announced the date in bus shelter posters and social media toolkits. *Id.*
- National Urban League has 11,000 volunteers across 90 affiliates in 37 states. Green Decl. ¶ 4. “[W]hen the Census Bureau announced its extension of the timeline for collecting responses to the 2020 Census, the National Urban league informed all members of the 2020 Census Black Roundtable that the deadline had become October 31, 2020. The members in turn conveyed to their own networks and constituents, causing a cascading effect.” *Id.* ¶ 14.

Third, the Replan exposed the same people—people who believe that October 31, 2020 was the Census deadline—to fines and violations of federal law. By way of background, the Census Act imposes a “clear legal duty to participate in the decennial census.” *California v. Ross*, 362 F. Supp. 3d 727, 739 (N.D. Cal. 2018) (Seeborg, J.) (citing 13 U.S.C. § 221). Specifically, 13 U.S.C. § 221(a) provides that any adult who “refuses or willfully neglects . . . to answer, to the best of his knowledge, any of the questions on” the census “shall be fined not more than \$100.” 13 U.S.C. § 221(a). “[E]ach unanswered question” risks an additional fine. *Morales v. Daley*, 116 F. Supp. 2d at 809; *accord United States v. Little*, 317 F. Supp. 1308, 1309 (D. Del. 1970) (“Presumably there could be a separate violation for each unanswered question.”). The 2020 Census form has nine questions for the first person in a household and seven questions for each additional person. *See* U.S. Census Bureau, *2020 Census Questionnaire* (last revised Mar. 7, 2020), <https://www.census.gov/programs-surveys/decennial-census/technical-documentation/questionnaires/2020.html>. The resulting liability for “refus[ing] or willfully neglect[ing]” to answer an entire Census questionnaire is thus significant. 13 U.S.C. § 221(a).

Because of the excellent publicizing of the COVID-19 Plan, the Replan increased the risk that people will incur that liability. Before the Replan was announced on August 3, 2020, the Bureau and its partners (such as Plaintiff National Urban League) advertised for months that the deadline for census responses was October 31, not September 30 or October 15, 2020. *See supra* Section III-B-4. As a result, some people may have refused to respond to the questionnaire—or an enumerator’s non-response follow-up—on the misunderstanding that they had until October 31,

1 2020 to comply. This “increase [in] *risk* of incurring penalties in a future enforcement proceeding”  
 2 still “constitute[s] ‘legal consequences’ under *Bennett*.” *Ipsen Biopharmaceuticals, Inc. v. Azar*,  
 3 943 F.3d 953, 957–59 (D.C. Cir. 2019) (emphasis in original) (holding also that “the agency’s  
 4 exercise of prosecutorial discretion” is not enough to render agency action non-final).

5 **b. The Replan directly affects Defendants by binding them for 10 years to a**  
 6 **less accurate tabulation of total population.**

7 For Defendants, the Replan gives rise to legal consequences because it effectively binds  
 8 Defendants—for the next decade—to a less accurate “tabulation of total population by States”  
 9 under the “decennial census.” 13 U.S.C. § 141(b). The Replan does this by committing Defendants  
 10 to compressing census self-response from 33.5 weeks to 29 weeks; Non-Response Follow Up  
 11 (“NRFU”) from 11.5 weeks to 7.5 weeks; and data processing from 26 weeks to 13 weeks. *See*,  
 12 *e.g.*, *Nat. Res. Def. Council v. EPA*, 643 F.3d 311, 319–20 (D.C. Cir. 2011) (“[T]he Guidance binds  
 13 EPA regional directors and thus qualifies as final agency action.”).

14 The result of this significant compression during this unprecedented pandemic will be  
 15 inaccuracies in the “tabulation of total population.” Inaccuracies in the tabulation harm  
 16 constitutional and statutory interests. *See, e.g., Evans*, 536 U.S. at 478 (finding a “strong  
 17 constitutional interest in accuracy”); 1998 Appropriations Act, § 209, 111 Stat. at 2481 (“Congress  
 18 finds that . . . it is essential that the decennial enumeration of the population be as accurate as  
 19 possible . . .”). Those constitutional and statutory harms—and Defendants’ choice of speed over  
 20 accuracy—will endure until 2030.

21 A less weighty and more easily revocable constraint on the Government was found final in  
 22 *Hawkes Co.*, 136 S. Ct. at 1814. There, an internal memorandum of agreement between two  
 23 federal agencies provided that the Army Corps of Engineers could issue “jurisdictional  
 24 determinations” (“JDs”) that were generally “binding on the Government” for five years. *Id.* The  
 25 Supreme Court held that the JDs were final agency action under *Bennett v. Spear* even though  
 26 (1) the JDs could be appealed and “revisited,” *see id.* at 1813–14; and (2) the JDs’ source of  
 27 authority, the memorandum of agreement, never went through notice and comment and was

1 represented as *non*-binding by the United States. *See id.* at 1817 (opinions of Kennedy, J.,  
2 concurring; and Ginsburg, J., concurring in part and concurring in the judgment). By contrast, here  
3 (1) Defendants did not waver in their commitment to end data collection and are trying to deliver  
4 apportionment figures to the President as soon as possible; and (2) there is no doubt that the  
5 Replan will bind the United States to this Census and “tabulation of total population” until 2030.

6 Defendants’ latest argument against final agency action is inapposite. In their motion to  
7 dismiss, Defendants argue that the Replan is not final because “the data collection phase of the  
8 2020 Census has already concluded.” Mot. at 22. Defendants’ argument is a non-sequitur. The  
9 Replan was final before and is final now. A final agency action does not become non-final after it  
10 is implemented. To the contrary, the end of data collection shows that the Replan set legal  
11 obligations that Defendants then enforced. Regardless, Plaintiffs will suffer many legal  
12 consequences that flow not only from data collection, but also data processing. As Census Bureau  
13 officials have stated, “[a]ny effort to concatenate or eliminate processing and review steps to  
14 reduce the timeframes will significantly reduce the accuracy of the apportionment counts and the  
15 redistricting data products.” DOC\_8337.

16 Thus, because the Replan determines rights and obligations and gives rise to legal  
17 consequences, the Replan constitutes final agency action.

18 **c. *Franklin v. Massachusetts* shows why the Replan is final agency action.**

19 To argue that the Replan does not constitute final agency action, Defendants rely on the  
20 Supreme Court’s decision in *Franklin v. Massachusetts*, 505 U.S. 788 (1992). Mot. at 22. *Franklin*  
21 concerned the Secretary of Commerce’s transmission of the census report to the President.  
22 *Franklin*, 505 U.S. at 797–98. There, the data presented to the President—the allocation of  
23 overseas military personnel to states based on their “home of record”—was still subject to  
24 correction by the Secretary. *Id.* In addition, the President could instruct the Secretary to reform the  
25 census. *Id.* at 798. The Secretary’s report to the President thus was a “moving [target]” or a  
26 “tentative recommendation,” rather than a “final and binding determination.” *Id.* It carried “no  
27 direct consequences for the reapportionment.” *Id.* Based on these characteristics, the transmission

1 of the census report was not final agency action. *Id.* at 798.

2 *Franklin* underscores why the Replan constitutes final agency action. The Replan is neither  
3 a “tentative recommendation” nor a decision that will be reviewed by a higher official. *Id.* Rather,  
4 the Secretary directed the Bureau to develop the Replan on July 29, 2020 and approved the Replan  
5 on August 3, 2020. Moreover, as a practical matter, no time remains for agency reconsideration.  
6 The Replan’s field operations ended on October 15, 2020 after the Supreme Court granted  
7 Defendants’ application for a stay. *See* U.S. Census Bureau, *Census Bureau Statement on 2020*  
8 *Census Data Collection Ending* (Oct. 13, 2020).

9 The Replan also has “direct consequences for the reapportionment.” *Id.* The Replan  
10 determines when data collection will end—past which people can no longer participate in the  
11 census—and solidifies an undercount that will carry through to Congressional reapportionment,  
12 federal funding, and more for a decade. By contrast, in *Franklin*, the data the Secretary reported  
13 could have had zero effect. The President could have “reform[ed] the census” and allocated  
14 already-counted servicemembers not by “home of record,” but by “legal residence,” “last duty  
15 station,” or no “particular State[.]” *Id.* at 792, 794; *see also* *U.S. House of Reps. v. U.S. Dep’t of*  
16 *Commerce*, 11 F. Supp. 2d at 93 (distinguishing *Franklin* on the same ground).

17 In any event, “[e]ven in the [*Franklin*] Court’s view, the Secretary’s report of census  
18 information to recipients other than the President would certainly constitute ‘final agency action.’”  
19 *Franklin*, 505 U.S. at 815 n.14 (Stevens, J., concurring in part and concurring in the judgment).  
20 That is because only the President may order the Secretary “to reform the census, even after the  
21 data are submitted to him.” *Id.* at 798. Data recipients such as the states can do no such thing.  
22 Accordingly, the Secretary’s reporting of “counts as they are used for intra-state *redistricting* and  
23 *for federal fund allocation . . . is final agency action for purposes of APA review.*” *City of New*  
24 *York v. U.S. Dep’t of Commerce*, 822 F. Supp. 906, 918–19 (E.D.N.Y. 1993) (emphasis in original)  
25 (challenging guidelines that led Secretary not to adjust undercount), *vacated on non-APA grounds*,  
26 34 F.3d 1114 (2d Cir. 1994), *rev’d sub nom. Wisconsin v. City of New York*, 517 U.S. at 12 n.7  
27 (noting that “[plaintiffs] did not appeal the District Court’s treatment of their statutory claims” to

1 the Second Circuit). Plaintiffs here likewise challenge the Replan’s undercount as it will be used in  
2 intra-state redistricting and federal fund allocation.

3 Last year’s citizenship question cases further underscore why the Replan is final agency  
4 action. In those cases, the United States conceded that adding the citizenship question to the  
5 census questionnaire constituted final agency action. *See New York*, 351 F. Supp. 3d at 645;  
6 *Kravitz v. Dep’t of Commerce*, 336 F. Supp. 3d 545, 566 n.13 (D. Md. 2018). There is no reason  
7 that a memorandum announcing the addition of a question would mark the agency “complet[ing]  
8 its decisionmaking process” and “directly affect[ing] the parties,” *Franklin*, 505 U.S. at 797, but  
9 the Replan would not. In both cases, the Secretary directed the development of and adopted the  
10 Replan; the Bureau viewed the Secretary’s decision as binding; and the decision directly affects  
11 the parties. In sum, the Replan is final agency action.

12 **F. The Replan is not committed to agency discretion by law.**

13 Defendants’ last argument on reviewability is that the administration of the census—  
14 including the Replan—is “committed to agency discretion by law.” 5 U.S.C. § 701(a)(2). The  
15 Court disagrees.

16 The APA creates a “strong presumption favoring judicial review of administrative action.”  
17 *Mach Mining, LLC v. EEOC*, 575 U.S. 480, 489 (2015). One exception includes those actions that  
18 are “committed to agency discretion by law.” 5 U.S.C. § 701(a)(2). However, courts have read this  
19 exception quite narrowly. This exception encompasses situations where Congress explicitly  
20 precludes review, or ““those rare circumstances where the relevant statute is drawn so that a court  
21 would have no meaningful standard against which to judge the agency’s exercise of discretion.””  
22 *Weyerhaeuser*, 139 S. Ct. at 370 (quoting *Lincoln v. Vigil*, 508 U.S. 182, 191 (1993)). This latter  
23 exception has generally been limited to “certain categories of administrative decisions that courts  
24 traditionally have regarded as committed to agency discretion . . . such as a decision not to  
25 institute enforcement proceedings . . . or a decision by an intelligence agency to terminate an  
26 employee in the interest of national security.” *Dep’t of Commerce*, 139 S. Ct. at 2568 (citations and  
27 quotation marks omitted) (citing *Heckler v. Chaney*, 470 U.S. 821, 831–32 (1985), and *Webster v.*

1 *Doe*, 486 U.S. 592, 600–01 (1988)).

2 *Department of Commerce v. New York* controls. There, the Supreme Court concluded that  
 3 “[t]he taking of the census is not one of those areas traditionally committed to agency discretion.”  
 4 139 S. Ct. at 2568. Collecting case law, the Supreme Court noted that “courts have entertained  
 5 both constitutional and statutory challenges to census-related decisionmaking.” *Id.* (citing, *e.g.*,  
 6 *Carey*, 637 F.2d at 839, in which the Second Circuit concluded that the Bureau’s decision not to  
 7 use “Were You Counted” forms or to compare census records with records of Medicaid-eligible  
 8 people “was not one of those ‘rare instances’ where agency action was committed to agency  
 9 discretion”); *see also City of Los Angeles v. U.S. Dep’t of Commerce*, 307 F.3d 859, 869 n.6 (9th  
 10 Cir. 2002) (rejecting argument that the Bureau’s decision not to adopt statistically adjusted  
 11 population data was committed to agency discretion by law). The Supreme Court explained that  
 12 there were meaningful standards against which to judge the taking of the census, including the  
 13 Census Act, which requires that the agency “conduct a census that is accurate and that fairly  
 14 accounts for the crucial representational rights that depend on the census and the apportionment.”  
 15 *Id.* at 2568–69 (quoting *Franklin*, 505 U.S. at 819–20 (Stevens, J., concurring in part and  
 16 concurring in judgment)).

17 Here, Plaintiffs challenge the Replan—a set of deadlines for “the taking of the census.” *Id.*  
 18 at 2568. Plaintiffs’ claims, like those in *Department of Commerce v. New York*, arise under the  
 19 Enumeration Clause and the APA. Here too, the Census Act provides a meaningful standard  
 20 against which to judge Defendants’ action. The Replan’s change in deadlines affects the accuracy  
 21 of the enumeration, as did the decision to omit certain records in *Carey* or reinstate the citizenship  
 22 question in *New York*. Accordingly, the Replan is not committed to agency discretion.

23 In sum, Defendants’ motion to dismiss is meritless.

24 **G. Staying this case is unwarranted.**

25 The Court now turns to Defendants’ motion to stay this case. In determining whether to  
 26 grant a stay, the Court weighs three factors: (1) the possible damage to the non-moving party, (2)  
 27 “the hardship or inequity which a party may suffer in being required to go forward,” and (3) “the

1 orderly course of justice.” *CMAX*, 300 F.2d at 268; *see also Lockyer*, 398 F.3d at 1110 (applying  
2 *Landis* factors). None of the factors supports staying this case.

3 First, Plaintiffs would likely suffer irreparable harm from a stay. As detailed in the standing  
4 analysis above, *see supra* Section III-B, Plaintiffs rely on accurate census data for federal funds,  
5 political representation, and the allocation of limited resources for a decade. Thus, the longer  
6 Plaintiffs must wait for potential relief, the more harm they will suffer. Under the Court’s current  
7 case schedule, there is no time for delay. The earliest Plaintiffs could receive relief is likely after  
8 congressional apportionment because the summary judgment hearing is on February 18, 2021, and  
9 the bench trial begins on March 19, 2021. Both dates are well after January 11, 2021—the  
10 deadline for the President’s transmittal of congressional apportionment figures to Congress. *See* 2  
11 U.S.C. § 2a(a) (setting deadline).

12 Second, Defendants will not suffer “hardship or inequity” without a stay. *CMAX*, 300 F.2d  
13 at 268. For one, Defendants’ stay motion rests on an outdated premise. Defendants’ stay motion  
14 assumes that the Court set a schedule of “expedited litigation with the goal of having the Court  
15 enter judgment before the end of December.” ECF No. 355 at 8. That expedited schedule,  
16 Defendants argue, “would be extremely disruptive.” *Id.* Yet after Defendants filed their stay  
17 motion, the Court rejected Plaintiffs’ proposed schedule. ECF No. 357. The Court will not enter  
18 judgment until February 18, 2021 at the earliest. Thus, Defendants’ claim of “extreme[]  
19 disrupti[on]” fails to account for the additional months that Defendants now have to manage this  
20 lawsuit.

21 For another, Defendants fail to show hardship or inequity under the current case schedule.  
22 “[B]eing required to defend a suit, without more, does not constitute a ‘clear case of hardship or  
23 inequity’ within the meaning of *Landis*.” *Lockyer*, 398 F.3d at 1112. Defendants’ claimed  
24 hardships are simply the burden of “being required to defend a suit.” *Id.* Specifically, Defendants  
25 assert that the lawsuit will “burden[] employees at a time when their work is most crucial.” ECF  
26 No. 355 at 8. *Lockyer* holds that this burden fails to support a stay.

27 Moreover, the Court has imposed significant limits on discovery that reduce any hardship

1 on Defendants. For instance, although the Federal Rules of Civil Procedure (the “Federal Rules”)  
 2 permit 10 depositions per side, the Court cut that number nearly in half, permitting only 6  
 3 depositions. *See* Fed. R. Civ. P. 30(a)(1); ECF Nos. 357 (case management order), 372 (Order to  
 4 Compel). Similarly, the Federal Rules permit 25 interrogatories per side, but the Court cut that  
 5 number by 60%, permitting only 10 interrogatories. *See* Fed. R. Civ. P. 33(a)(1); ECF No. 357.  
 6 The Federal Rules also permit an unlimited number of Requests for Admission (“RFAs”) and  
 7 Requests for Production (“RFPs”), but the Court permitted only 25 RFAs and 25 RFPs per side in  
 8 the instant case. *See* Fed. R. Civ. P. 34, 36; ECF No. 357. Thus, Defendants fail to make a “clear  
 9 case of hardship or inequity” that would result from litigating this case. *Lockyer*, 398 F.3d at 1112.

10 Lastly, the orderly course of justice militates against a stay. The orderly course of justice is  
 11 “measured in terms of the simplifying or complicating of issues, proof, and questions of law which  
 12 could be expected to result from a stay.” *CMAX*, 300 F.2d at 268. Moreover, the Ninth Circuit has  
 13 “repeatedly admonished district courts not to delay trial preparation to await an interim ruling on a  
 14 preliminary injunction.” *California v. Azar*, 911 F.3d 558, 583–84 (9th Cir. 2018). Here,  
 15 Defendants ask this Court to do what the Ninth Circuit has admonished against. Specifically,  
 16 Defendants ask the Court to wait “until Defendants’ appeal of the preliminary injunction is  
 17 resolved and the Bureau completes the 2020 Census.” ECF No. 355 at 5. The grounds for this  
 18 request are stale. They are the same reviewability and ripeness grounds that this Court and the  
 19 Ninth Circuit have rejected. *See* Section III-A through F, *supra*. Thus, the orderly course of justice  
 20 fails to support Defendants’ stay motion.

21 In sum, none of the stay factors support staying this case.

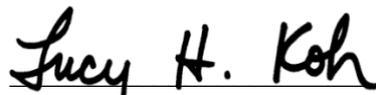

#### 22 **IV. CONCLUSION**

23 For the foregoing reasons, the Court DENIES Defendants’ motion to dismiss the Second  
 24 Amended Complaint and Defendants’ motion for stay of proceedings. Because fact discovery  
 25 closes on January 7, 2021, Defendants shall file an answer to the Second Amended Complaint by  
 26 December 30, 2020.
