**THE ARKANSAS BOARD  
OF APPOINTMENT, *et al.***

**DEFENDANTS**

**PLAINTIFFS' MOTION FOR JUDICIAL NOTICE OF CENSUS DATA**

Pursuant to Rule 201(b)(2) of the Federal Rules of Evidence, Plaintiffs Arkansas State Conference NAACP and the Arkansas Public Policy Panel respectfully ask the Court to take judicial notice of the following facts based on data produced by the Census Bureau.

Census data “is an appropriate and frequent subject of judicial notice.” *Hollinger v. Home State Mut. Ins. Co.*, 654 F.3d 564, 572-73 (5th Cir. 2011) (per curiam); *see, e.g., Benavidez v. City of Irving*, 638 F. Supp. 2d 709, 721 (N.D. Tex. 2009) (taking judicial notice of an American Community Survey publication and observing “that the Census Bureau considers ACS data reliable and intends for it to be relied upon in decisions such as Voting Rights Act compliance”); *Wright v.*

*Sumter Cnty. Bd. of Elections and Registration*, No. 1:14-CV-42, 2017 WL 10845104 at \*1-2 (M.D. Ga. 2017) (taking judicial notice of data from the ACS and decennial census in a case under Section 2 of the Voting Rights Act); *Paulson v. Meier*, 232 F. Supp. 183, 186 (D.N.D. 1964) (taking judicial notice of county population in voting case); *City of Port Arthur v. United States*, 517 F. Supp. 987, 993 n.5 (D.D.C.1981) (three-judge district court) (taking judicial notice of decennial census data in a case under the Voting Rights Act), *aff'd* 459 U.S. 159 (1982); *see also, e.g., Town of Fletcher v. Hickman*, 165 F. 403, 406 (8th Cir. 1908) (taking judicial notice of the census data for the population of a city); *Giron v. City of Alexander*, 693 F. Supp. 2d 904, 930-31 (E.D. Ark. 2010) (same); *Wilson v. Ill. Cent. R.R. Co.*, No. 09-cv-7392, 2012 WL 135446, at \*3 (N.D. Ill. Jan. 12, 2012) (taking judicial notice of ACS data and collecting cases). Census data is presumed accurate until proven otherwise, and proof of changed figures must be clear and convincing to override the presumption. *Missouri State Conf. of the NAACP v. Ferguson-Florissant Sch. Dist.*, 894 F.3d 924, 932 (8th Cir. 2018); *McNeil v. Springfield Park Dist.*, 851 F.2d 937, 946 (7th Cir. 1988).

These facts are relevant to the claim before this Court. “Evidence is relevant if: (a) it has any tendency to make a fact more or less probable than it would be without the evidence; and (b) the fact is of consequence in determining the action.” Fed. R. Evid. 401. Plaintiffs bring their claim under Section 2 of the Voting Rights Act, under which Congress has outlined several factors for courts to consider when

determining whether violations have occurred. *See* S. Rep. No. 97-417, at 28-30 (1982), *as reprinted in* 1982 U.S.C.C.A.N. 177, 205-08. The fifth Senate Factor is “[t]he extent to which members of the minority group in the state or political subdivision bear the effects of discrimination in such areas as education, employment and health, which hinder their ability to participate effectively in the political process.” S. Rep. No. 97-417, at 29, *as reprinted in* 1982 U.S.C.C.A.N. at 206. Census data are routinely used to establish the fifth Senate Factor.

The facts below reflect data that are publicly available on the Census Bureau’s website. All census data supporting these facts are attached.

Plaintiffs ask the Court to take judicial notice of the following:

1. According to the 2020 Census, the State of Arkansas has a total population of 3,011,524 persons, of whom 2,063,550 (68.5%) are non-Hispanic White, 495,968 (16.5%) are Black (alone or in combination with another racial group), and 452,006 (15.0%) are members of other racial or ethnic groups. Ex. 11 at 45, 53 ([2020 Table P1](#); [2020 Table P2](#)).
2. According to the 2020 Census, Arkansas has a voting-age population of 2,312,273 persons, of whom 1,653,772 (71.5%) are non-Hispanic White, 351,878 (15.2%) are Black (alone or in combination with

another racial group), and 306,623 (13.3%) are members of other racial or ethnic groups. Ex. 11 at 61, 70 ([2020 Table P3](#); [2020 Table P4](#)).

3. According to the Census Bureau's 2019 American Community Survey (ACS) 1-year estimates, which is the most recent citizenship data available, Arkansas has a citizen voting-age population of 2,235,415 persons, of whom 1,727,484 (77.3%) are non-Hispanic White, 345,456 (15.5%) are Black alone, and 162,475 (7.2%) are members of other racial or ethnic groups. Ex. 11 at 165 ([Table S2901](#)).
4. Arkansas's total population has grown by 95,606 persons since the 2010 Census. Compare Ex 11 at 2 ([2010 Table P1](#)) *with* ex. 11 at 45 ([2020 Table P1](#)).
5. Arkansas's Black population has grown since the 2010 Census, in both absolute and relative numbers. In 2010, Arkansas's total Black population (alone or in combination) was 468,710 (16.1%). Ex 1 at 2 ([2010 Table P1](#)). Since then, Arkansas's Black population (alone or in combination) has grown by 27,258 people, and Black Arkansans' share of the state's total population has increased by 0.4 percentage points. Compare Ex 1 at 2 ([2010 Table P1](#)) *with* ex. 11 at 45 ([2020 Table P1](#)).
6. Arkansas's White population has decreased since the 2010 Census, both in absolute and relative numbers. In 2010, Arkansas's non-Hispanic white population was 2,173,469 persons (74.5%). Ex. 11 at

27 (2010 Table P5). Since then, Arkansas's non-Hispanic White population has decreased by 109,919 persons, and white Arkansans' share of the state's total population has decreased by 6.0 percentage points. *Compare* Ex. 11 at 27 (2010 Table P5) *with* ex. 11 at 53 (2020 Table P2).

7. Arkansas's voting-age population has grown by 107,830 persons since the 2010 Census. *Compare* Ex 1 at 10 (2010 Table P3) *with* ex. 11 at 61 (2020 Table P3).
8. Arkansas's Black voting-age population has grown since the 2010 Census, in both absolute and relative numbers. In 2010, Arkansas's Black voting-age population (alone or in combination) was 321,201 (14.6%). Ex 11 at 10 (2010 Table P3). Since then, Arkansas's Black voting-age population (alone or in combination) has grown by 30,677 people, and Black Arkansans' share of the state's total population has increased by 0.6 percentage points. *Compare* Ex 11 at 10 (2010 Table P3) *with* ex. 11 at 61 (2020 Table P3).
9. Arkansas's White voting-age population has decreased since the 2010 Census, both in absolute and relative numbers. In 2010, Arkansas's non-Hispanic white voting-age population was 1,708,907 persons (77.5%). Ex. 11 at 19 (2010 Table P4). Since then, Arkansas's non-Hispanic White voting-age population has decreased by 55,135

persons, and white Arkansans' share of the state's voting-age population has decreased by 6.0 percentage points. *Compare* Ex. 11 at 19 (2010 Table P4) with ex. 11 at 70 (2020 Table P4).

10. According to the 2019 1-year ACS, 12.6% of Arkansas's population aged 25 years and over lacks a high-school diploma or its equivalent. Among non-Hispanic white persons, 10.1% lack a high-school diploma, whereas 13.1% of Black persons lack a high-school diploma. Ex. 11 at 77-89 (Tables B15002, B15002B, and B15002H).
11. According to the 2019 1-year ACS, 23.3% of Arkansas's population aged 25 years and over has a bachelor's degree or higher. Among non-Hispanic white persons, 24.9% have a bachelor's degree or higher, whereas 17.0% of Black (alone) persons have a bachelor's degree or higher. Ex. 11 at 117-122 (Table S1501).
12. According to the 2019 1-year ACS, Arkansas has an unemployment rate of 4.8% among people in the labor force aged 16 years and over. The unemployment rate is 4.2% for non-Hispanic white persons and 7.4% for Black (alone) persons. Ex. 11 at 147-48 (Table S2301).
13. According to the 2019 1-year ACS, Arkansas has a poverty rate of 16.2%. The poverty rate is 13.3% for non-Hispanic white persons and 27.1% for Black (alone) persons. Ex. 11 at 126-28 (Table S1701).

14. According to the 2019 1-year ACS, the median household income in Arkansas is \$48,952. The median income is \$52,788 for households headed by non-Hispanic white persons and \$33,625 for households headed by Black persons. Ex. 11 at 132-34 ([Table S1903](#)).
15. According to the 2019 1-year ACS, the per capita income in Arkansas is \$27,274. The per capita income is \$30,250 for non-Hispanic white persons and \$18,986 for Black (alone) persons. Ex. 11 at 93-101 (Tables [B19301](#), [B19301B](#), and [B19301H](#)).
16. According to the 2019 1-year ACS, 65.5% of all households in Arkansas own their own homes. Among households headed by a non-Hispanic white person, 71.1% own their own homes and 28.9% rent their homes. Among households headed by a Black (alone) person, 44.7% own their own homes and 55.3% rent their homes. Ex. 11 at 152-55 ([Table S2502](#)).
17. According to the 2019 1-year ACS, 11.0% of all households in Arkansas receive Supplemental Nutrition Assistance Program (“SNAP”) benefits (also known as food stamps). Among households headed by a non-Hispanic white person, 8.4% receive SNAP benefits, while 42.6% of households headed by a Black (alone) person do. Ex. 11 at 138-42 ([Table S2201](#)).

18. According to the 2019 1-year ACS, 6.9% of all households in Arkansas lack access to a computer in the home. Among households headed by a non-Hispanic White person, 6.2% have no computer, while 11.3% of households headed by a Black (alone) person have no computer. Ex 1 at 159-62 ([Table S2802](#)).
19. According to the Census Bureau's estimates of registration and voting in the November 2020 election, 62.0% of all citizens in Arkansas were registered to vote. The voter registration rate for non-Hispanic white citizens was 64.1%, and the voter-registration rate for Black (alone or in combination) citizens was 57.2%. Ex. 11 at 38-43 ([2020 P20 Table 4b](#)).
20. According to the Census Bureau's estimates of registration and voting in the November 2020 election, 54.0% of all citizens in Arkansas turned out to vote. The voter-turnout rate for non-Hispanic white citizens was 57.0%, and the voter-turnout rate for Black (alone or in combination) citizens was 44.1%. Ex. 11 at 38-43 ([2020 P20 Table 4b](#)).
21. According to the Census Bureau's estimates of registration and voting in the November 2018 election, 58.5% of all citizens in Arkansas were registered to vote. The voter registration rate for non-Hispanic white citizens was 59.3%, and the voter-registration rate for Black (alone or

in combination) citizens was 56.6%. Ex. 11 at 28-37 ([2018 P20 Table 4b](#)).

22. According to the Census Bureau's estimates of registration and voting in the November 2018 election, 42.6% of all citizens in Arkansas turned out to vote. The voter-turnout rate for non-Hispanic white citizens was 44.0%, and the voter-turnout rate for Black (alone or in combination) citizens was 41.6%. Ex. 11 at 28-37 ([2018 P20 Table 4b](#)).
23. According to the 2000 Census, the value of 69.1% of owner-occupied housing units headed by Black (alone) Arkansans was below \$60,000, while the value of 66.8% of owner-occupied housing units headed by non-Hispanic White Arkansans was above \$60,000. Ex. 11 at 110-13 ([Table HCT041B](#); [HCT041I](#)).
24. According to the 2000 Census, 20.1% of households headed by Black Arkansas lacked access to a vehicle, while only 5.8% of households headed by non-Hispanic White Arkansans lacked access to a vehicle. Ex. 11 at 104-07 (Table [HCT033B](#); [HCT033I](#)).

<sup>1</sup> This figure added to or subtracted from the estimate provides the 90-percent confidence interval.

NOTES:

A dash '-' represents zero or rounds to zero.

The symbol B means that the base is less than 75,000 and therefore too small to show the derived measure.

Estimates may not sum to totals due to rounding.

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see <https://www.census.gov/programs-surveys/cps/technical-documentation/complete.2020.html>

<b>TABLE NOTES</b>	Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.	

Table: ACSDT1Y2019.B15002

	<p>Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.</p> <p>Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.</p>
	Source: U.S. Census Bureau, 2019 American Community Survey 1-Year Estimates
	Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.
	The 2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.
	Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Table: ACSDT1Y2019.B15002

	<p>Explanation of Symbols: * An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.</p> <p>* An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.</p> <p>* An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.</p> <p>* An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.</p> <p>* An "***" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.</p> <p>* An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.</p> <p>* An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.</p> <p>* An "(X)" means that the estimate is not applicable or not available.</p>

<b>TABLE NOTES</b>	Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.	

Table: ACSDT1Y2019.B19301B

	<p>Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.</p> <p>Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.</p>
	Source: U.S. Census Bureau, 2019 American Community Survey 1-Year Estimates
	Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.
	Between 2018 and 2019 the American Community Survey retirement income question changed. These changes resulted in an increase in both the number of households reporting retirement income and higher aggregate retirement income at the national level. For more information see Changes to the Retirement Income Question .
	The 2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.
	Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Table: ACSDT1Y2019.B19301B

	<p>Explanation of Symbols: * An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.</p> <p>* An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.</p> <p>* An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.</p> <p>* An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.</p> <p>* An "***" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.</p> <p>* An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.</p> <p>* An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.</p> <p>* An "(X)" means that the estimate is not applicable or not available.</p>

<b>TABLE NOTES</b>	Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.	

Table: ACSST1Y2019.S1501

	<p>Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.</p> <p>Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.</p>
	Source: U.S. Census Bureau, 2019 American Community Survey 1-Year Estimates
	<p>Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.</p>
	<p>The 2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.</p>
	<p>Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.</p>

Table: ACSST1Y2019.S1501

	<p>Explanation of Symbols: * An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.</p> <p>* An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.</p> <p>* An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.</p> <p>* An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.</p> <p>* An "****" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.</p> <p>* An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.</p> <p>* An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.</p> <p>* An "(X)" means that the estimate is not applicable or not available.</p>

<b>TABLE NOTES</b>	Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.	

Table: ACSST1Y2019.S1701

	<p>Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.</p> <p>Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.</p>
	Source: U.S. Census Bureau, 2019 American Community Survey 1-Year Estimates
	Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.
	Dollar amounts are adjusted to respective calendar years. For more information, see: Change to Income Deficit.
	The 2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.
	Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Table: ACSST1Y2019.S1701

	<p>Explanation of Symbols: * An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.</p> <p>* An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.</p> <p>* An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.</p> <p>* An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.</p> <p>* An "***" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.</p> <p>* An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.</p> <p>* An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.</p> <p>* An "(X)" means that the estimate is not applicable or not available.</p>
<b>COLUMN NOTES</b>	None

<b>TABLE NOTES</b>	Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.	

Table: ACSST1Y2019.S1903

	<p>Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.</p> <p>Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.</p>
	Source: U.S. Census Bureau, 2019 American Community Survey 1-Year Estimates
	Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.
	Between 2018 and 2019 the American Community Survey retirement income question changed. These changes resulted in an increase in both the number of households reporting retirement income and higher aggregate retirement income at the national level. For more information see Changes to the Retirement Income Question .
	The categories for relationship to householder were revised in 2019. For more information see Revisions to the Relationship to Household item.
	The 2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.
	Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Table: ACSST1Y2019.S1903

	<p>Explanation of Symbols: * An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.</p> <p>* An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.</p> <p>* An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.</p> <p>* An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.</p> <p>* An "***" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.</p> <p>* An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.</p> <p>* An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.</p> <p>* An "(X)" means that the estimate is not applicable or not available.</p>

<b>TABLE NOTES</b>	Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.	

Table: ACSST1Y2019.S2301

	<p>Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.</p> <p>Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.</p>
	Source: U.S. Census Bureau, 2019 American Community Survey 1-Year Estimates
	Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.
	Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.
	The "Employed" and "Unemployment rate" columns refer to the civilian population. For more information, see the ACS Subject Definitions.
	The 2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.
	Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Table: ACSST1Y2019.S2301

	<p>Explanation of Symbols: * An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.</p> <p>* An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.</p> <p>* An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.</p> <p>* An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.</p> <p>* An "***" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.</p> <p>* An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.</p> <p>* An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.</p> <p>* An "(X)" means that the estimate is not applicable or not available.</p>

<b>TABLE NOTES</b>	Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.	

Table: ACSST1Y2019.S2802

	<p>Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.</p> <p>Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.</p>
	Source: U.S. Census Bureau, 2019 American Community Survey 1-Year Estimates
	Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.
	Data about computer and Internet use were collected by asking respondents to select "Yes" or "No" to each type of computer and each type of Internet subscription. Therefore, respondents were able to select more than one type of computer and more than one type of Internet subscription.
	An Internet "subscription" refers to a type of service that someone pays for to access the Internet such as a cellular data plan, broadband such as cable, fiber optic or DSL, or other type of service. This will normally refer to a service that someone is billed for directly for Internet alone or sometimes as part of a bundle.
	Caution should be used when comparing data for computer and Internet use before and after 2016. Changes in 2016 to the questions involving the wording as well as the response options resulted in changed response patterns in the data. Most noticeable are increases in overall computer ownership or use, the total of Internet subscriptions, satellite subscriptions, and cellular data plans for a smartphone or other mobile device. For more detailed information about these changes, see the 2016 American Community Survey Content Test Report for Computer and Internet Use located at <a href="https://www.census.gov/library/working-papers/2017/acs/2017_Lewis_01.html">https://www.census.gov/library/working-papers/2017/acs/2017_Lewis_01.html</a> or the user note regarding changes in the 2016 questions located at <a href="https://www.census.gov/programs-surveys/acs/technical-documentation/user-notes/2017-03.html">https://www.census.gov/programs-surveys/acs/technical-documentation/user-notes/2017-03.html</a> .
	The category "With a broadband Internet subscription" refers to those who said "Yes" to at least one of the following types of Internet subscriptions: Broadband such as cable, fiber optic, or DSL; a cellular data plan; satellite; a fixed wireless subscription; or other non-dial up subscription types. The category "Without an Internet subscription" includes those who accessed the Internet without a subscription and also those with no Internet access at all.

Table: ACSST1Y2019.S2802

	The category "No computer in household" consists of those who said "No" to all of the following types of computers: Desktop or laptop; smartphone; tablet or other portable wireless computer; and some other type of computer.
	The 2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.
	Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
	<p>Explanation of Symbols: * An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.</p> <p>* An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.</p> <p>* An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.</p> <p>* An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.</p> <p>* An "****" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.</p> <p>* An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.</p> <p>* An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.</p> <p>* An "(X)" means that the estimate is not applicable or not available.</p>
